

TERRUS PRO

(3-1-4-2)

Premium granulated
carbon-based organic fertiliser

Terrus Pro is a premium granulated, carbon-based fertiliser. Boosted with blood and bone, gypsum and sulphate of potash, each granule conditions the soil while delivering a balanced combination of nutrients and trace elements essential for healthy plant growth.

Manufactured from a high quality, nutrient and humic rich compost, Terrus Pro improves soil carbon levels, enhances nutrient cycling, water holding capacity and microbial activity.

Why Use Terrus Pro?

Terrus Pro is a premium carbon-based fertiliser, enhanced with:

- Blood & bone
- Micronised gypsum
- Sulphate of potash
- A balanced blend of slow-release nutrients
- An important source of available trace elements
- Rich in humic acid and labile carbon
- Organic certified by Australian Certified Organic
- Freshcare compliant for horticultural producers
- Granulated for ease of handling, storage and application
- Suitable for fertiliser spreaders including all granular application equipment
- Blends well with conventional fertilisers

Soil Health

Terrus Pro is based on a single source composted cow manure, high in labile carbon and humic acids that provide a range of important benefits including:

- Improve soil structure, reduce high water and nutrient losses in poor soils
- Helps to buffer soil pH
- Enhance plants' natural resistance to diseases and pests
- Stimulates root growth and improve the plant uptake of nutrients and water
- Labile carbon is a major food source for soil microbes

Terrus Pro is enhanced with additional ingredients to improve the available nutrients:

- Blood and bone is a valuable source of nitrogen, phosphorous and calcium
- Gypsum supplies calcium and sulphur and conditions the soil
- Sulphate of Potash boosts the potassium level, essential for all plant growth.
