

COVID-19 Prescreening Tool

This tool is to be used by campers and/or staff 14 days immediately before arrival at camp. The intent is to create a conscious effort for self-examination of potential symptoms. Campers and staff are encouraged to bring this document share during the initial health screening process at camp.

Screening Element	Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
Temperature? (Take Temp)							
Cough? (Y/N)							
Headache? (Y/N)							
Shortness of breath or difficulty breathing? (Y/N)							
Fever (>100.4)? (Y/N)							
Chills? (Y/N)							
Muscle aches? (Y/N)							
New loss of taste or smell? (Y/N)							
Nausea, vomiting, or diarrhea? (Y/N)							
Quarantined for at least 2 weeks directly prior to camp? (Y/N)							
Exposed to someone ill or someone who has had COVID-19? (Y/N)							
National or International travel in the last month? (Y/N)							

Y = Yes; N = No

Quarantine: The request is to have individuals separate themselves from the larger population in an effort to help minimize the risk of being exposed to coronavirus.
