### RC Foam

1092175 2cm x 4cm x 3mm 10/box

### RC Tape

1092176 2.5 x 7.5cm x 1mm 10/box

## CREST PRESERVATION OF INTACT ALVEOLUS

Recommended by Dr. Aron Gonshor, PhD, DDS, FRCD(C), FAO

Atraumatic tooth extraction without flap reflection. Note: Maintain intact bony walls of the extraction socket and preserve gingival anatomy.

Alveolar socket is grafted to crest with xenograft bone mineral (NuOss®).

A resorbable collagen plug (RCP) is cut to size and compressed in place as a dressing.

Criss-cross and/or mattress sutures are placed.

A removable or fixed prosthesis with an ovate pontic extending 2-3mm subgingivally is placed. This permits plug compression and tissue support.
