Integrated
Optimisation and
Trading in a MultiMarket
Environment

Our Presenters

Camilla Larsen VP Energy Software

Martin Teci VP Strategic Growth Initiatives

Volue develop and deliver software that enables our customers to maximise returns from participation in the power markets

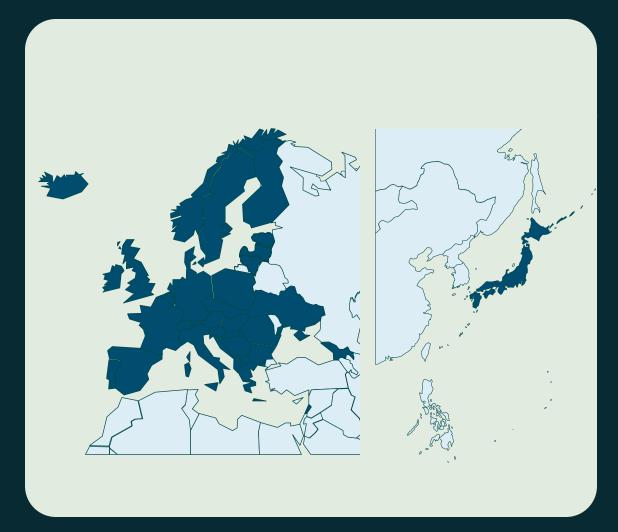

Trusted by over **280 customers** for optimising production planning and trading

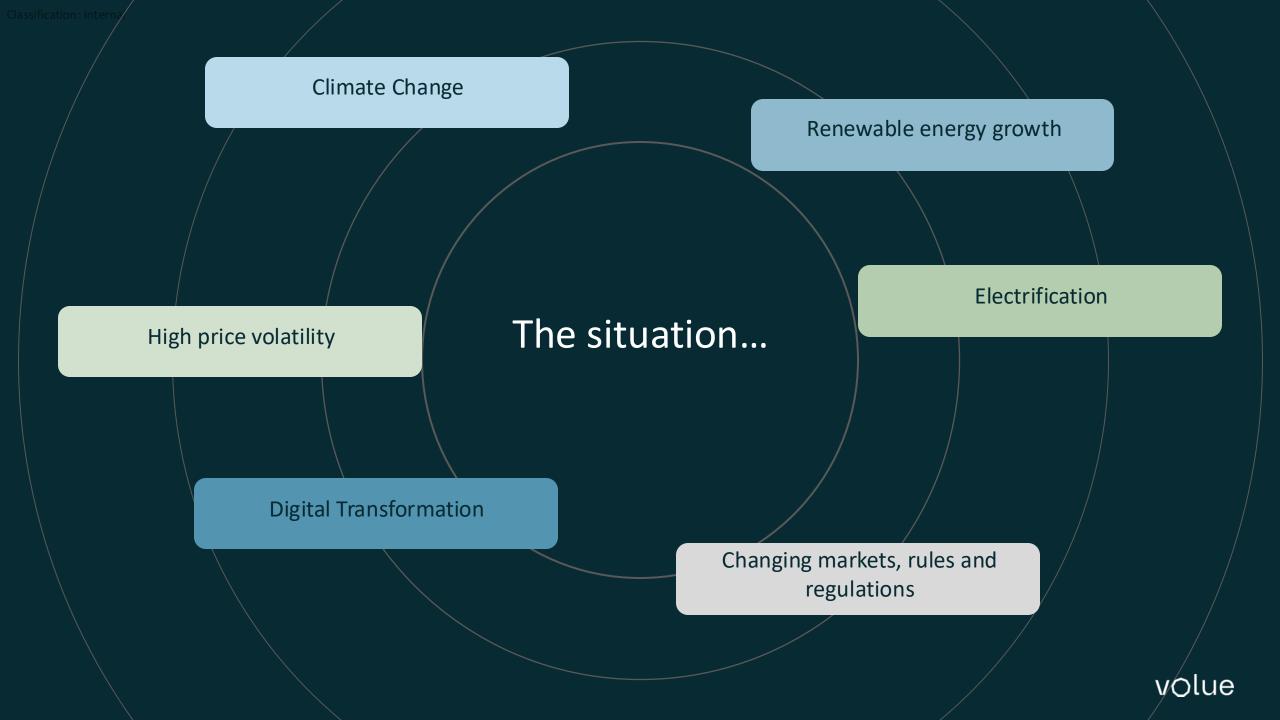

Our customers are located across **40+ countries**

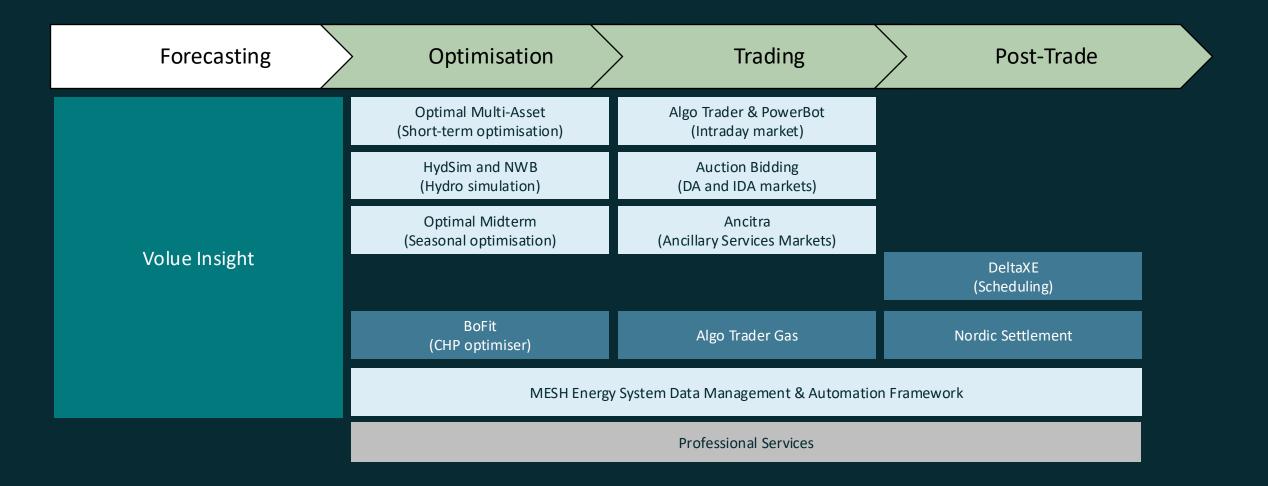

Our large customer base provides continuous feedback, driving ongoing improvements and developments in our software

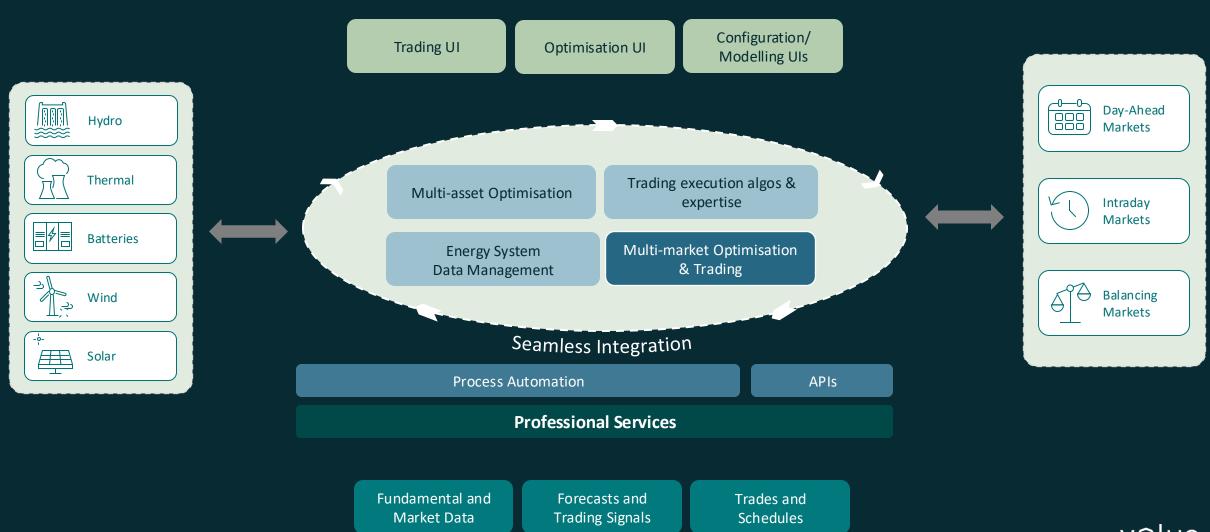

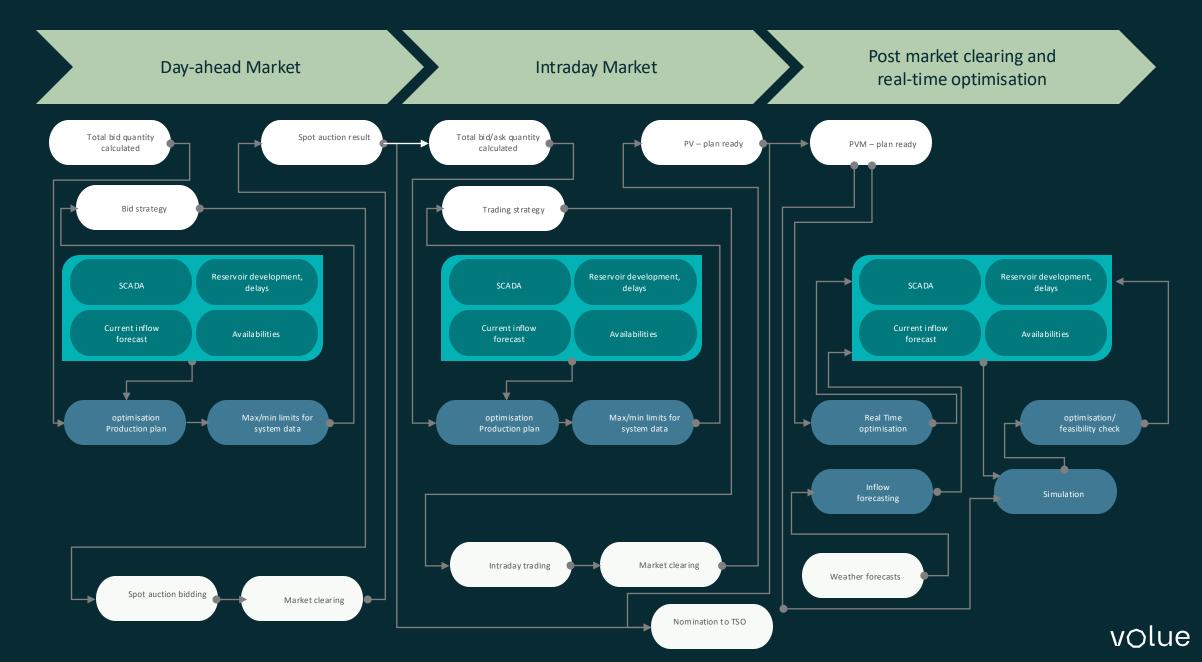

Energy Software – Delivering Products and Services Along the Value Chain

Volue Smart Power and Trading Software

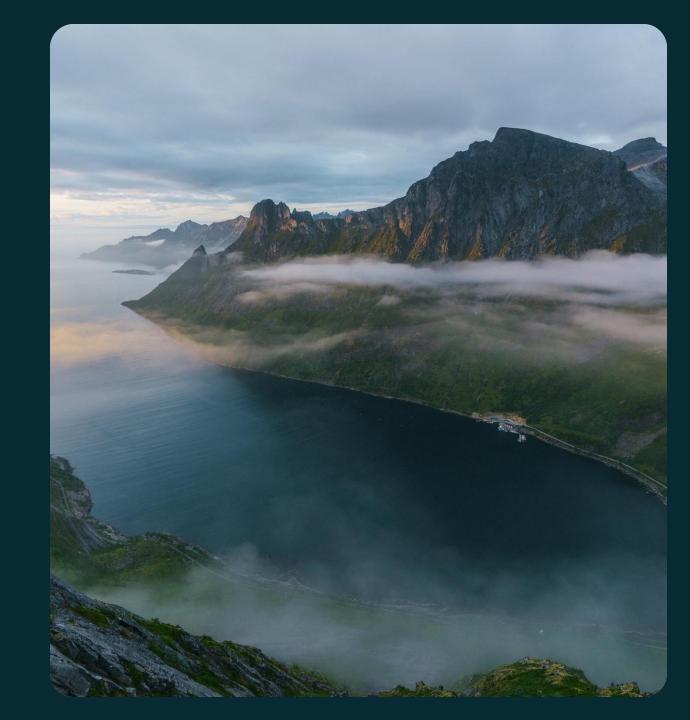

Maximising profits through integrated and scalable asset optimisation and trading

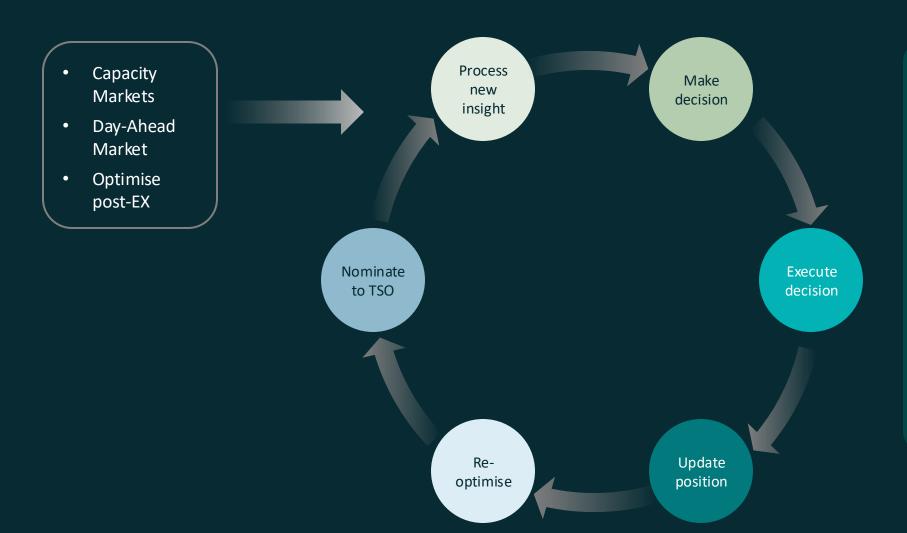

volue

Are you truly maximising your revenue potential?

There's a value potential with every decision you make

The right digital tools and automation is key

- Market insights
- Invest in optimisation
- Invest in trading
- Optimise your processes
- Consider multi-market opportunities

Short-term Power Markets | Overview

Example: Germany D-1 (day before delivery) D (day of delivery) Balancing – capacity auctions – FCR GTC: D-1 08:00 4h blocks - 6 periods Balancing – capacity auctions – aFRR 4h blocks - 6 periods GTC: D-1 09:00 4h blocks - 6 periods Balancing – capacity auctions – mFRR Gate closure: D-1 10:00 Gate closure: D-1 12:00 15 min products - 96 periods Day-ahead Gate closure: D-1 15:00 Intraday auction 1 (IDA1) 15 min products - 96 periods Gate closure: D-1 22:00 Intraday auction 2 (IDA2) 15 min products - 96 periods Intraday auction 3 (IDA3) 15 min products - 96 periods Gate closure: D-0 10:00

Continuous intraday market

Balancing – energy markets – mFRR

Balancing – energy markets – aFRR

Germany: 5 minutes before, Nordic: 60 minutes before

Gate closure: 25 minutes before

Gate closure: 25 minutes before

Strategic Roadmap: Empowering Smarter Energy Decisions – Our Journey Together

Strong Foundation in Place Today

- Proven, high-performance tools for optimisation and trading
- Active across most European markets with multi-market capabilities
- Trusted platform supporting critical energy decisions every day

SaaS Transformation & Expanded Capabilities

- Transition of optimisation suite to SaaS enables faster onboarding, scalability, and lower IT effort
- Access to new markets and services e.g., Nordic mFRR, multiexchange support
- Launch of advanced features like auction bidding, flex strategies, and backtesting tools empowers customer innovation

Seamless Solution Integration

- Unified workflows between optimisation and trading reduce manual effort
- Connected data and processes enable faster, coordinated decisions
- Single platform to manage and operate complex multi-market portfolios

Intelligent Orchestration & Recommendations

- Smart guidance on how to allocate volumes across available markets
- Strategy automation driven by real-time conditions and portfolio needs
- Maximum efficiency with minimal operational complexity

volue

Thank you!
