

## Example illustration

### Purpose of this example illustration

This isn't a personal illustration, it is based on the assumptions detailed later on in this document. The purpose of the illustration is to show how fund related costs and charges can affect the overall value of the funds that we've chosen to illustrate on over a period of time.

#### Fund transaction costs and charges total (%)

	Lifestyle (PPL Cash Fund / PPL Global Equity Fund / PPL Index Linked Fund)*	Diversified Global Equity	PPL Cash Fund
Growth	0.00% to 3.00%	3.00%	0.00%
AMC	0.25% to 0.65%	0.85%	0.25%
AAE	0.00% to 0.01%	0.04%	0.01%
TC	0.00% to 0.10%	0.09%	0.00%

\* As the Lifestyle investment option consists of multiple investment funds we have shown the range of growth and fund costs & charges.

**Growth** is the assumed growth rate for the fund after taking into account assumed price inflation of 2% per annum.

**AMC** is the Annual Management Charge, which is a yearly management charge expressed as an annual percentage but calculated and deducted on a daily basis from the fund.

**AAE** are the Additional Annual Expenses, which are an estimate of any additional fees and expenses that may apply, such as fees for custody, administration and trustee services that may be incurred in addition.

**TC** are the Transaction Costs, which are an estimate of explicit and implicit costs incurred as a result of buying, selling, lending or borrowing of investments in the fund, based on the actual annual transaction costs for the period 01/01/2020 to 31/12/2022.

#### The impact of transaction costs and charges on fund values (£)

The 'Before Charges' column shows each fund value without any transaction costs, charges or expenses being applied to the fund's holdings.

The 'After all charges' column shows the fund's holdings after transaction costs, charges and expenses have been deducted.

Years	Lifestyle (PPL Cash Fund / PPL Global Equity Fund / PPL Index Linked Fund)*		Diversified Global Equity		PPL Cash Fund	
	Before Charges	After all charges	Before Charges	After all charges	Before Charges	After all charges
1	1610	1604	1610	1602	1586	1583
3	5045	4986	5045	4969	4827	4808
5	8780	8613	8780	8563	8164	8111
10	19575	18836	19575	18617	16947	16732
15	32743	30897	32743	30359	26395	25902
20	48704	45054	48704	44007	36558	35665
25	67945	61598	67945	59807	47491	46066
30	91033	80854	91033	78032	59252	57155
35	118627	103191	118627	98985	71903	68986
40	151491	129022	151491	123006	85512	81615
45	189446	157990	190512	150475	100152	95106
49	209322	172827	226851	175212	112658	106562

## **About this illustration**

The current age is 16 and retirement age is 65.

The current salary is £20,000 and will increase each year by 3.5%.

Future contributions paid will be 8% of the salary (£133.33 each month increasing by 3.5% each year in line with assumed salary increases).

We've shown the default Lifestyle (PPL Cash Fund / PPL Global Equity Fund / PPL Index Linked Fund) option that the majority of members invest in.

We've also shown the Diversified Global Equity fund and the PPL Cash Fund fund to show the funds with the highest and lowest charges for comparison

## **Investment growth**

We've taken account of statutory guidance when preparing these illustrations. The value of the investments will grow at a rate appropriate to the funds invested in and inflation will be 2.0% every year. This is an illustrative growth rate only. The investment growth achieved may be more or less than this and may vary depending on the fund(s) invested in.

The assumed growth rate used for each fund is shown above.

If the growth rate we've used is:

- the same as the rate of inflation this reduces the growth rate, after making an allowance for inflation, to 0%;
- less than the rate of inflation, this produces a negative growth rate after making an allowance for inflation.
