

# Example illustration

## Purpose of this example illustration

This isn't a personal illustration, it is based on the assumptions detailed later on in this document. The purpose of the illustration is to show how fund related costs and charges can affect the overall value of the funds that we've chosen to illustrate over a period of time.

Fund transaction costs and charges total (%)		
Lifestyle (Sterling Liquidity /Passive Long dated Gilt / Passive UK Equity)*		
Passive Long dated Gilt		
Growth	0.00% to 3.00%	0.00%
AMC	0.80%	0.80%
AAE	0.00%	0.00%
TC	0.01% to 0.07%	0.07%
Passive UK Equity		

\* As the Lifestyle investment option consists of multiple investment funds we have shown the range of growth and fund costs & charges.

**Growth** is the assumed growth rate for the fund after taking into account assumed price inflation of 2% per annum.

**AMC** is the Annual Management Charge, which is a yearly management charge expressed as an annual percentage but calculated and deducted on a daily basis from the fund.

**AAE** are the Additional Annual Expenses, which are an estimate of any additional fees and expenses that may apply, such as fees for custody, administration and trustee services that may be incurred in addition.

**TC** are the Transaction Costs, which are an estimate of explicit and implicit costs incurred as a result of buying, selling, lending or borrowing of investments in the fund, based on the actual annual transaction costs for the period 01/01/2020 to 31/12/2024.

## The impact of transaction costs and charges on fund values (£)

The 'Before Charges' column shows each fund value without any transaction costs, charges or expenses being applied to the fund's holdings.

The 'After all charges' column shows the fund's holdings after transaction costs, charges and expenses have been deducted.

Lifestyle (Sterling Liquidity /Passive Long dated Gilt / Passive UK Equity)*		Passive Long dated Gilt		Passive UK Equity	
Years	Before Charges	After all charges	Before Charges	After all charges	Before Charges
1	1586	1578	1586	1578	1610
3	4827	4765	4827	4763	5045
5	8164	7994	8164	7988	8780
10	16947	16265	16947	16242	19575
15	26395	24847	26395	24795	32743
20	36558	33777	36558	33683	48704
25	47491	43093	47491	42946	67945
30	59252	52836	59252	52625	91033

## About this illustration

The current age is 16 and retirement age is 65.

The current salary is £20,000 and will increase each year by 3.5%.

Future contributions paid will be 8% of the salary (£133.33 each month increasing by 3.5% each year in line with assumed salary increases).

We've shown the default Lifestyle (Sterling Liquidity /Passive Long dated Gilt / Passive UK Equity) option that the majority of members invest in.

We've also shown the Passive Long dated Gilt fund and the Passive UK Equity fund to show the funds with the highest and lowest charges for comparison

## Investment growth

We've taken account of statutory guidance when preparing these illustrations. The value of the investments will grow at a rate appropriate to the funds invested in and inflation will be 2.0% every year. This is an illustrative growth rate only. The investment growth achieved may be more or less than this and may vary depending on the fund(s) invested in.

The assumed growth rate used for each fund is shown above.

If the growth rate we've used is:

- the same as the rate of inflation this reduces the growth rate, after making an allowance for inflation, to 0%;
- less than the rate of inflation, this produces a negative growth rate after making an allowance for inflation.
