

SCOTTISH FRIENDLY ASSURANCE SOCIETY LIMITED
Solvency and Financial Condition Report 2025

SUMMARY

Scottish Friendly Assurance Society Limited ('Scottish Friendly') is a modern financial mutual based in Glasgow, with roots that stretch back to 1862. Comprising Scottish Friendly Assurance Society Limited ('SFAS'), Scottish Friendly Asset Managers ('SFAM') and a number of smaller subsidiaries, the Group develops and administers a range of life and investment products including ISAs. These products are marketed under the Scottish Friendly brand or are "white labelled" by other financial services providers.

Today, as at 31 December 2025, the Group has assets under management of £4.4 billion (2024 restated: £4.3 billion) and has an estimated 855,000 members (2024: 853,000).

The business is well-capitalised, reflecting the strength of the capital position and actions taken to manage that position. The solvency and liquidity positions are monitored frequently, and actions taken, as appropriate, to protect the long-term interests of policyholders and the overall capital and liquidity position of Scottish Friendly.

Over the past decade Scottish Friendly has developed and restructured significantly - building on existing strengths by investing in improving customer experience, developing people and targeting further growth in customer base and the products and services offered.

Since 2012, Scottish Friendly's organic growth has been founded on the introduction of innovative and affordable ISA investments via the Group's My Plans platform, including a multi-award-winning Junior ISA for children, and a range of protection products. Scottish Friendly has continued to deliver sales and increase membership as a result of strong e-business and direct marketing and major collaborations with companies like the Neilson Financial Services and Guardian Financial Services. The success of this strategy was reflected in another year of strong financial results, with Scottish Friendly delivering total sales of £56.1m APE¹ (2024: £50.6m). The increase of 11% was due to strong sales of Scottish Friendly products, which grew by over 60% compared to 2024, partially offset by sales of protection business, which fell by 8% compared to 2024.

This growth has been built on the foundation of a robust capital position, with a solvency ratio² of 197% (2024: 216%) under the PRA regulations. This ratio has remained resilient in light of continued volatility in financial markets and shows a significant excess over the minimum required by regulations, as well as the level required by Scottish Friendly's own risk appetite. Our solvency ratio demonstrates that, even in an extreme 1-in-200 year scenario, we expect to have enough capital to meet our liabilities to policyholders.

This report is the Solvency Financial Condition Report ('SFCR') for SFAS. It is a solo report covering SFAS' activities.

¹ Annual Premium Equivalent, the industry standard measure of premium volumes, calculated as the annual amount of regular premiums plus one tenth of the single premiums on business written during the year.

² The solvency ratio is the Own Funds divided by the Solvency Capital Requirement ('SCR')

DIRECTORS' RESPONSIBILITIES STATEMENT IN RESPECT OF THE SOLVENCY AND FINANCIAL CONDITION REPORT ('SFCR')

The Directors are responsible for preparing the SFCR in accordance with applicable law and regulations.

The PRA Rulebook requires that Scottish Friendly must have in place a policy of ensuring the ongoing appropriateness of any information disclosed and that Scottish Friendly must ensure that its SFCR is approved by the Directors.

Each Director certifies that:

- a) the SFCR has been properly prepared in all material respects in accordance with the PRA rulebook and regulatory framework;
- b) throughout the financial year in question, the Company has complied in all material respects with the requirements of the PRA rulebook and regulatory framework as applicable to the Company; and
- c) it is reasonable to believe that, at the date of the publication of the SFCR, the Company has continued so to comply, and will continue so to comply in future.

By order of approval of the Board.

Report of the external independent auditors to the Directors of Scottish Friendly Assurance Society Limited ('the Society') pursuant to Rule 4.1 (2) of the External Audit Part of the PRA Rulebook applicable to Solvency UK firms

Report on the Audit of the relevant elements of the Solvency and Financial Condition Report

Opinion

We have audited the following documents prepared by the Society as at 31 December 2025:

- The 'Valuation for solvency purposes' and 'Capital management' sections of the Solvency and Financial Condition Report of the Society as at 31 December 2025, (**'the Narrative Disclosures subject to audit'**); and
- Company templates IR.02.01.02, IR.12.01.02, IR.23.01.01, IR.25.04.21 and IR.28.01.01 (**'the Templates subject to audit'**).

The Narrative Disclosures subject to audit and the Templates subject to audit are collectively referred to as the '**relevant elements of the Solvency and Financial Condition Report**'.

We are not required to audit, nor have we audited, and as a consequence do not express an opinion on:

- the **Other Information** which comprises:
 - The 'Summary', 'Business and performance', 'System of governance' and 'Risk profile' elements of the Solvency and Financial Condition Report;
 - Company templates IR.05.02.01, IR.05.03.02, IR.05.04.02; and
 - The written acknowledgement by management of their responsibilities, including for the preparation of the Solvency and Financial Condition Report (**'the Responsibility Statement'**).

In our opinion, the information subject to audit in the relevant elements of the Solvency and Financial Condition Report of the Society as at 31 December 2025 is prepared, in all material respects, in accordance with the financial reporting provisions of the PRA Rules and Solvency II regulations on which they are based.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) including ISA (UK) 800 and ISA (UK) 805, and applicable law. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the relevant elements of the Solvency and Financial Condition Report* section of our report. We are independent of the Society in accordance with the ethical requirements that are relevant to our audit of the Solvency and Financial Condition Report in the UK, including the FRC's Ethical Standard as applied to public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

In forming our opinion on the Solvency and Financial Condition Report, which is not modified, we have considered the adequacy of the disclosure made in A.5 concerning the Group's and the Society's ability to continue as a going concern. As described in A.5, the proposed transfer of engagements under Part VIII of the Friendly Societies Act 1992 to OneFamily will result in all assets, rights and liabilities of the Society transferring to OneFamily, and the Society will be dissolved on the transfer date. Completion of the transaction remains conditional and is dependent upon receiving both Member and Regulatory Approval from the PRA. While the Board currently expects the transaction to complete in early 2027, there remains uncertainty over the timing and fulfilment of the conditions needed for the proposed transfer. If the transaction does not proceed or is delayed, the Group and Society is considered to have adequate resources to continue in business for at least 12 months from the date of approval of these financial statements. These conditions, along with the other matters explained in A.5, indicate the existence of a material uncertainty which may cast significant doubt about the Group's and the company's ability to continue as a going concern. The Solvency and Financial Condition Report does not include the adjustments that would result if the Group and the company were unable to continue as a going concern

In auditing the Solvency and Financial Condition Report, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the Solvency and Financial Condition Report is appropriate.

Our evaluation of the directors' assessment of the Group's and the Society's ability to continue to adopt the going concern basis of accounting included:

- Obtained management's going concern assessment and challenged the rationale for downside scenarios adopted and material assumptions made using our knowledge of the Group's business performance, review of regulatory correspondence and obtaining further corroborating evidence;
- Considered management's assessment of the regulatory solvency coverage and liquidity in management's future forecast;
- Obtained information surrounding the intentions for the Scottish Friendly and OneFamily merger to corroborate the facts and circumstances used by management in determining the expected likelihood of completion in the going concern period; and.

- Considered information obtained during the course of the audit and publicly available market information to identify any evidence that would contradict management's assessment of going concern.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Emphasis of Matter - Basis of Accounting

We draw attention to the 'Valuation for solvency purposes' and 'Capital management' of the Solvency and Financial Condition Report, which describe the basis of accounting. The Solvency and Financial Condition Report is prepared in compliance with the financial reporting provisions of the PRA Rules, and therefore in accordance with a special purpose financial reporting framework. The Solvency and Financial Condition Report is required to be published, and intended users include but are not limited to the Prudential Regulation Authority. As a result, the Solvency and Financial Condition Report may not be suitable for another purpose. Our opinion is not modified in respect of this matter.

Other Information

The Directors are responsible for the Other Information.

Our opinion on the relevant elements of the Solvency and Financial Condition Report does not cover the Other Information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the Solvency and Financial Condition Report, our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the relevant elements of the Solvency and Financial Condition Report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the relevant elements of the Solvency and Financial Condition Report or a material misstatement of the Other Information. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Directors for the Solvency and Financial Condition Report

The Directors are responsible for the preparation of the Solvency and Financial Condition Report in accordance with the financial reporting provisions of the PRA Rules

The Directors are also responsible for such internal control as they determine is necessary to enable the preparation of a Solvency and Financial Condition Report that is free from material misstatement, whether due to fraud or error.

Auditors' Responsibilities for the Audit of the relevant elements of the Solvency and Financial Condition Report

It is our responsibility to form an independent opinion as to whether the information subject to audit in the relevant elements of the Solvency and Financial Condition Report is prepared, in all material respects, in accordance with financial reporting provisions of the PRA Rules.

Our objectives are to obtain reasonable assurance about whether the relevant elements of the Solvency and Financial Condition Report are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but it is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the decision making or the judgement of the users taken on the basis of the Solvency and Financial Condition Report.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Society and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of UK regulatory principles, such as those governed by the Prudential Regulation Authority ("PRA") and the Financial Conduct Authority (FCA), and we considered the extent to which non-compliance might have a material effect on the Solvency and Financial Condition Report. We also considered those laws and regulations that have a direct impact on the Solvency and Financial Condition Report such as applicable Solvency II regulations. We evaluated management's incentives and opportunities for fraudulent manipulation of the Solvency and Financial Condition Report (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate adjustments between UKGAAP and Solvency II values and management bias in accounting estimates and judgemental areas of the Solvency and Financial Condition Report, such as the best estimate liabilities. Audit procedures performed included:

- Discussions with the Board, management, Internal Audit and senior management involved in the Risk and Compliance function, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reading key correspondence with, and reports to, the PRA and the FCA in relation to compliance with laws and regulations;
- Reviewing relevant meeting minutes including those of the Audit Committee, the Risk Committee and the Technical Provisions Committee;
- Reviewing data regarding policyholder complaints, the Society's register of litigation and claims, Internal Audit reports and compliance reports in so far as they related to non-compliance with laws and regulations and fraud;

- Procedures relating to balances that include accounting estimates and judgements, such as the valuation of best estimate liabilities;
- Identifying material adjustments to derive for Solvency II financial information from the statutory financial statements and assessing for indicators of material non-compliance with Solvency II regulations; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the Solvency and Financial Condition Report. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for the Board of Directors of the Society in accordance with External Audit rule 2.1 of the Solvency II firms Sector of the PRA Rulebook and for no other purpose. We do not, in providing this report, accept or assume responsibility for any other purpose or to any other party save where expressly agreed by our prior consent in writing.

Report on Other Legal and Regulatory Requirements

In accordance with Rule 4.1 (3) of the External Audit Part of the PRA Rulebook for Solvency II firms we are also required to consider whether the Other Information is materially inconsistent with our knowledge obtained in the audit of the relevant elements of the Solvency and Financial Condition Report and (where applicable) the audit of the Society's statutory financial statements. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

A Business and Performance

A.1 Business

Scottish Friendly is an incorporated friendly society, a type of mutual, and consequently there are no shareholders in Scottish Friendly. The organisational structure of the business is detailed below:

- Green denotes an insurance company, subject to full Senior Managers & Certification Regime (“SM&CR”) rules.
- Blue denotes a firm regulated in accordance with the Prudential Sourcebook for Investment Firms (‘IFPRU’), in scope for SM&CR.
- Purple denotes an unregulated entity not in scope for SM&CR.

Scottish Friendly Asset Managers Limited is authorised and regulated by the Financial Conduct Authority and is the manager for transactions in Scottish Friendly ISAs, Junior ISAs and Child Trust Funds.

The principal activity of Scottish Friendly Insurance Services Limited is the provision of administration services and it was de-regulated in October 2022. SFIS (Nominees) Limited is currently dormant.

MGM Assurance (Trustees) Limited and SF Pension Managers & Trustees Limited are the trustee entities for the oversight of certain closed pensions schemes. Scottish Friendly Investment Funds ICVC, an OEIC (Open Ended Investment Company), provides the stocks and shares component for some Scottish Friendly ISA and Child Trust Funds.

All of the above are registered in Scotland, other than MGM Assurance (Trustees) Limited and SF Pension Managers & Trustees Limited which is registered in England and Wales.

Scottish Friendly offers a range of life insurance products to policyholders in the United Kingdom. The main products are whole of life policies, endowment assurances, term assurance and ISAs.

The Scottish Friendly balance sheet is split between its Main Fund, which is open to new business, and three sub-funds to the Main Fund, which are closed to new business. The closed sub funds are the Scottish Legal Life sub-fund, the Marine & General Mutual (‘M&GM’) sub-fund and the Manulife sub-fund.

Limited volumes of legacy products were sold across Europe either by Scottish Legal Life and M&GM and, where relevant, premiums are still received for these.

Scottish Friendly is authorised and regulated by the Prudential Regulatory Authority ('PRA'), which is located at 20 Moorgate, London EC2R 6DA.

Scottish Friendly is also regulated by the Financial Conduct Authority ('FCA'), which is located at 12 Endeavour Square, London, E20 1JN.

Scottish Friendly's auditor is PricewaterhouseCoopers LLP, whose office is 7 More London Riverside, London, SE1 2RT.

A.2 Underwriting Performance

The following table illustrates Scottish Friendly's performance over 2025, as reflected in the 2025 Annual Report and Financial Statements:

Technical Account - Long Term Business For year ended 31 December

	2025 £000	2024 £000 (restated)
Earned Premiums	248,578	219,722
Reinsurance Premiums	(105,382)	(97,754)
Earned Premiums, Net of Reinsurance	143,196	121,968
Investment Income	454,144	61,936
Unrealised (losses)/gains on Investments	(101,812)	181,571
Other Technical Income	30,655	30,940
Amortisation of Negative Goodwill	6,060	6,060
	532,243	402,475
Claims Incurred	256,751	254,140
Reinsurance Claims	(132,889)	(131,254)
Net Claims Incurred	123,862	122,886
Change in Long-term Business Provision	22,570	(68,652)
Change in Technical Provisions for Linked Liabilities	250,978	220,476
Operating Expenses	141,251	125,909
Investment Expenses & Charges	2,564	3,343
Other Technical Charges	427	1,108
Tax charge attributable to Long Term Business	9,963	6,964
Actuarial losses/(gains) re pension scheme	449	(182)
Transfer from the Fund for Future Appropriations	(19,821)	(9,377)
	532,243	402,475

Scottish Friendly writes four lines of business as detailed below:

- Insurance with participation
- Index Linked and Unit Linked
- Other Life Insurance
- Health Insurance business

The table below illustrates Scottish Friendly's premiums, claims and expenses split by Solvency II lines of business for the periods ended 31 December 2025 and 31 December 2024.

2025

	Insurance with participation £000	Index Linked & Unit Linked Insurance £000	Other Life Insurance £000	Health Insurance £000	Total £000
Gross Premiums	44,178	4,936	198,156	1,308	248,578
Gross Claims	95,483	27,023	131,471	2,774	256,751
Expense	10,299	1,150	132,061	305	143,815

2024

	Insurance with participation £000	Index Linked & Unit Linked Insurance £000	Other Life Insurance £000	Health Insurance £000	Total £000
Gross Premiums	33,706	6,099	178,095	1,822	219,722
Gross Claims	86,431	36,987	128,315	2,407	254,140
Expense	8,429	1,525	118,843	455	129,252

A.3 Investment Performance

The return attributed to the asset shares within the Scottish Friendly with-profits Main Fund for 2025 was 13.0% (2024: 7.3%) reflecting an overall positive return which was primarily driven by strong global equity markets, which recovered sharply following the mid-year weakness caused by US tariff actions.

Profitshare distribution of £4.9 million (2024: £4.5 million) was returned to eligible policyholders in the form of regular and final bonuses.

The Group assets under management increased to £4,446 million (restated 2024: £4,320 million), reflecting the investment market returns during the year and the combined impact of premiums received from policyholders and claims paid out, as well as reductions to the value of the reinsurance asset due to actuarial assumption and model changes.

Financial investments are recognised at fair value through profit or loss. Derivatives are recognised at their marked to market value.

Scottish Friendly manages these investments and makes purchase and sale decisions based on their fair value in accordance with Scottish Friendly's investment strategy. Upon initial recognition, attributable transaction costs are recognised in profit or loss as incurred.

The following table illustrates Scottish Friendly's investment performance over 2025, as reflected in the annual report and financial statements. The reduction in income from other investments reflects a significant rebalancing of the investment portfolio during the year, which resulted in a revised timetable for recognising investment income. The realised gains primarily arose from the disposal of a substantial volume of assets as part a project to rationalise the range of unit-linked funds offered on our contracts, crystallising gains that had accumulated over several years. The

unrealised losses are attributable to this same rationalisation process, as the associated gains have now been crystallised and recognised within realised gains.

	2025	2024
	£000	£000
Income from land & buildings	78	126
Income from other investments	66,983	82,324
Net gains/(losses) on the realisation of investments	387,341	(20,514)
Foreign exchange losses	(258)³	-
Unrealised (losses)/gains on investments	(101,812)	181,571
	352,332	243,507

³ To enhance the clarity and relevance of our financial reporting, foreign exchange gains/losses are now included within Investment Income from the current financial year onwards. This change reflects the nature of these gains/losses as part of investment-related activities. No prior period adjustment has been required, and comparative figures have not been restated.

A.4 Performance of other activities

Other technical income predominantly comprises fee income. Fee income is charged to policyholders for administration services and investment management services. These fees are recognised in the period over which the services are performed.

In 2025, the total other technical income was £30.7m, compared to £30.9m in 2024. Of the 2025 total, £24.7m relates to fee income (2024: £25.9m).

A.5 Any other material information

On 17 March 2025 Scottish Friendly executed an agreement with FIL Life Insurance Limited, part of Fidelity International Group, to acquire a book of unit-linked Section 32⁴ pensions business comprising £2.27bn assets under management across 76 schemes and covering c40,000 policyholders, and an in-payment annuities book with liabilities of c£7m and approximately 1,000 annuitants. This is subject to approval by the Court under Part VII of the Financial Services and Markets Act 2000 and is expected to be completed in the second half of 2026. An initial consideration of £8,100k was paid following the signing of the agreement. This is included within other debtors in the financial statements at year-end 2025.

In early February 2026, Scottish Friendly and Family Assurance Friendly Society Limited (“OneFamily”) announced proposals to merge. As at 31 December 2024 One Family had over 1.5 million members across the UK and £5.7 billion in assets under management. The proposed merger is subject to member and regulatory approval under Part VIII of the Friendly Societies Act 1992 and is expected to be effective in early 2027. The combined mutual will operate under the group name of OneFamily whilst maintaining the Scottish Friendly brand alongside the OneFamily and Beagle Street brands. No adjustment is required to the financial statements for the year ended 31 December 2025 from this proposed transaction.

⁴ Section 32 of the Finance Act 1981

B System of Governance

B.1 General information on the system of governance

As a mutual organisation, the Board of Management is responsible to the members for the performance of Scottish Friendly, and the service that is provided. This accountability is exercised through the Delegates system of member representation.

Scottish Friendly operates a delegate system to ensure that it engages with, and is accountable to, its members. Scottish Friendly has 30 delegate positions, each representing one of five geographical electoral districts (Scotland, Northern Ireland, North of England, South of England & Wales and Republic of Ireland). In addition to any vacancies that arise from time to time, one third of delegates have to retire in rotation each year and may offer themselves for re-election. The system allows members to have their views represented at the Annual General Meeting through their representative delegate (typically the delegate closest to them geographically).

The Board Members and Scottish Friendly Executives who have duties in relation to Scottish Friendly's subsidiaries are fully responsible for ensuring that they are managed to the same high standards and principles set out by Scottish Friendly.

Responsibilities have been allocated to senior management in accordance with the SM&CR. The functional structure of Scottish Friendly are set out in Appendices F1 and F2.

As a mutual, Scottish Friendly has no shareholders.

Internal Control Framework

The Board is responsible for directing the affairs of Scottish Friendly. In addition to the principles of prudent management, there are several specific powers given to the Board, which are defined in the Scottish Friendly Rules.

Although many of the powers regarding business conduct, operational management and day-to-day activities of Scottish Friendly are delegated to Executive Management, through the Chief Executive, there is a formal schedule of matters reserved to the Board for approval which includes: the authorisation regime for bank accounts, changes to investment parameters and deals out with those parameters, transfers of engagement, the budget and the distribution of surpluses and bonuses.

The Board also retains responsibility for a number of statutory duties relating to the prudent management of Scottish Friendly's activities; these include responsibility for maintaining required solvency and liquidity levels as well as maintenance of requisite accounting records and systems of control. The powers retained by the Board, and those delegated to the Chief Executive and to Board Committees, are reviewed at least annually by the Board.

The committee and governance structure is set out in detail in Appendix F1. The high-level structure is set out above and the responsibilities of the Committees are as follows:

Risk Committee

- Provides focused support and advice on risk strategy, assisting the Board in reviewing the systems for managing all aspects of business risk.
- Takes account of the most significant issues and risks, both operational and financial, likely to impact on Scottish Friendly's customers and the Group's financial statements.
- Reviews, challenges and approves the Risk Appetite Methodology and recommends the Statements to the Board for approval, including monitoring measures with limits and triggers that are the basis for regular Own Risk and Solvency Assessment (ORSA) reporting.
- Shapes the design and content of the Annual ORSA report to meet the requirements of the Board in terms of risk insights and forward-looking threats and reviews the design and execution of stress and scenario testing.
- Ensures there is a satisfactory framework in place with appropriate metrics for identifying and managing all aspects of risk within the business and to keep under review the steps taken by management to monitor, manage and mitigate risk.
- Receives regular reports from Executive Risk Committee and Risk and Compliance functions outlining the key risks facing Scottish Friendly and the controls and actions in place to mitigate their impacts.

Nomination Committee

- Ensures that plans are in place for orderly succession for appointments to the Board.
- Leads the process for such appointments and makes recommendations to the Board, taking into consideration the time commitments required of Non-Executive directors and their independence.
- Considers the overall balance of skills, experience and knowledge to ensure that Directors bring informed and independent judgement to the Board.
- Ensures that Scottish Friendly's employee policies are applied in Board nomination matters.

Investment Committee

- Oversees Scottish Friendly's investment holdings and performance on behalf of the Board.
- Makes decisions on asset allocation and strategy of the Scottish Friendly funds in line with the liabilities, relevant risk appetite and parameters established by the Board or by the relevant fund objective.
- Monitors risk appetite, investment parameters and fund objectives, making recommendations to the Board as appropriate.

Audit Committee

- Reviews internal control systems, including internal financial controls and ensures that these continue to be effective; advises the Risk Committee as appropriate of any concerns regarding the effectiveness of the current control framework.
- Considers the Audit Plan from external auditors which highlights key judgement areas and summarises changes in reporting requirements.
- Reviews the annual financial statements and regulatory returns and approves these for submission to the Board.
- Approves the internal audit programmes and receives regular process reports from internal audit and ensures that recommendations made are followed up. Also monitors co-ordination between the internal and external auditors and ensures that the Internal Audit Function (IAF) is adequately resourced and has appropriate standing within the organisation.
- Assesses the effectiveness of the internal and external audit processes through the reporting that it receives from the respective auditors who are present at each Committee meeting.
- Provides recommendations to the Board in relation to the appointment of the external auditors.

With-Profits Committee

- Provides recommendations and advice to the Board on the way each with-profits fund is managed.
- Considers compliance with the principles and practices set out in the relevant Principles and Practices of Financial Management (PPFM).
- Provides recommendations to the Board relating to changes that would result in a revision to the PPFM(s).
- Provides advice to the Board as to whether Scottish Friendly has effectively addressed the conflicting rights and interests of with-profits policyholders and other policyholders or stakeholders.
- Considers other issues which with-profits policyholders might reasonably expect the With-Profits Committee to be involved in, including bonus setting, the development of run-off plans and the identification of surplus within the various funds.

Remuneration Committee

- Reviews the remuneration of the Chair and other Non-Executive Directors and determines appropriate levels of Executive Management remuneration.

With-Profits Approval Committee

- Supports the Board in the consideration of certain delegated matters relating to the management of with-profits policies – such as approving changes in bonus rates and approving distributions of excess / miscellaneous surplus where these have been determined in accordance with frameworks specified by the Board – as well as to support the Board in its responsibilities as set out in COBS 20 insofar as they relate to the management of with-profits matters.

Details of the individuals performing key functions as at 31 December 2025 are set out in Appendix F2.

Remuneration Policy

Scottish Friendly's policy is to provide a competitive remuneration package which will attract and retain the appropriate calibre of Executive and Non-Executive Directors.

Executive Director salaries are reviewed annually. A range of data is taken into account to inform the review including comparable positions in other organisations, remuneration trends in the financial services sector, as well as wider economic influences. The Remuneration Committee ensures that it remains apprised of these factors and of best practice, taking external advice where appropriate.

The remuneration package for Executive Directors incorporates a performance element which is targeted at increasing growth and cost efficiencies while generating longer term value for members. Payments are capped at 100% of salary. In line with the relevant PRA requirements, 40% of bonus payments may require to be deferred for three years, if applicable.

Non-Executive Directors' duties and responsibilities are set out in Scottish Friendly's Governance and Control Procedures Manual. Non-Executive Directors initially hold office until the conclusion of the Annual General Meeting following their appointment, at which they are eligible for election without nomination. The circumstances in which a Board member would be required to vacate office are set out in the Rules of Scottish Friendly.

Fees for the Chair are set by the Committee in his absence. Fees for Non-Executive Directors are monitored and reviewed annually with changes effective from 1 May through approval by the Executive Directors and the Chair. Fees are designed to recognise the responsibilities of Non-Executive Directors and to attract individuals with the necessary skills and experience to contribute to the future development of Scottish Friendly.

Non-Executive Directors receive reimbursement of travel and accommodation costs where required for attending meetings.

The aggregate premiums payable for the year by directors (executive and non-executive) and key management personnel in respect of Scottish Friendly's products amounted to £820,374 (2024: £57,758).

At the year end, no Director of Scottish Friendly had any beneficial interest in shares of Scottish Friendly's subsidiary companies.

Service contracts

The Executive Directors have service agreements with a notice period of less than 12 months. The service agreements do not have a fixed term and provide for an assumed retirement at age 65.

In the event of termination, any payments made would be based on individual circumstances including the reason for termination and contractual obligations.

Changes to the System of Governance

There were no significant changes to the system of governance over 2025.

Assessment of the adequacy of Systems of Governance

The systems of governance in place within Scottish Friendly are assessed to be effective. The Board reports on its effectiveness as part of the Directors' Report in the Annual Report and Accounts. Where relevant, external support has been obtained to assess effectiveness. In addition, each Committee (where appropriate) completes an annual self-assessment to consider how effectively it has discharged its terms of reference, as well as more generally how effectively it has operated over the period. In addition, the Risk Committee undertakes an assessment of the effectiveness of the Risk Function and the Audit Committee undertakes an assessment of the effectiveness of the Internal Audit Function. This ensures that adequate and effective governance and oversight arrangements are in place.

B.2 Fit and Proper requirements

Scottish Friendly has been subject to the SM&CR since December 2018. The aim of the SM&CR is to reduce harm to consumers and strengthen market integrity by making individuals more accountable for their conduct and competence.

The SM&CR seeks to ensure that senior persons, who are responsible for overseeing and managing insurance firms, or who have responsibility for other key functions at those firms, will behave with integrity, honesty and skill.

The SM&CR consists of 3 parts:

- The Senior Managers Regime, which focuses on individuals who hold key roles within Scottish Friendly;
- The Certification Regime, which applies to other staff who could pose a risk of significant harm to Scottish Friendly or any of its customers; and
- The Conduct Rules, which are high level requirements that hold individuals to account.

Scottish Friendly has implemented appropriate processes and controls to comply with the SM&CR. All members of staff are provided with appropriate annual training on the Conduct Rules, how these apply to them and the standards of behaviour Scottish Friendly expects.

The responsibilities of Scottish Friendly's senior managers, and those of key function holders (KFHs) within the business, are documented in Scottish Friendly's Management Responsibilities Map and Manual.

Scottish Friendly ensures that individuals subject to the SM&CR are fit and proper to do their jobs. This requirement to assess fitness and propriety applies to:

- Senior Managers
- Individuals subject to the Certification Regime (including KFHs)

The fitness and propriety of an individual is performed before they commence the role, and thereafter on an annual basis.

In assessing whether an individual is fit and proper, Scottish Friendly will consider, and be satisfied that, an individual:

- Has the personal characteristics (including being of good repute and integrity);
- Possesses the level of competence, knowledge and experience;
- Has the qualifications; and
- Has undergone or is undergoing all training;

required to enable such person to perform their senior manager function, key function or certification function effectively and in accordance with any relevant regulatory requirements.

In determining whether an individual is fit and proper, Scottish Friendly considers the information contained in the following assessments:

- **Fitness and Propriety Questionnaire** - considers honesty, integrity and reputation and considers whether the individual is financially sound.
- **Regulatory References** (on commencement of employment) - provides information on previous employers' assessment of the individual's conduct and fitness and propriety.
- **Employee Screening Check** - supplements the self-attestation in the F&P questionnaire and identifies whether the individual has had any CCJ's/Court Decrees or Bankruptcy, Sequestration or Insolvency arrangements.
- **Criminal Records Check** (on commencement of employment) - supplements the F&P Questionnaire and considers whether the individual has been convicted of a criminal offence.
- **Competency Assessment** - records why the individual is competent and capable to carry out the function.

Conduct Assessment - considers whether the individual's past conduct has breached the regulator's conduct rules.

The Chief Executive performs the F&P assessments.

For individuals in the certification regime, a certificate will be issued confirming:

- that Scottish Friendly is satisfied that the person is a fit and proper person to perform the Certification Function;
- the aspects of the Scottish Friendly's business in which the individual is involved.

B.3 Risk management system including the Own Risk and Solvency Assessment

Risk governance

The overall accountability for oversight of risk management within the business ultimately rests with the Board.

The Board delegates responsibility for the oversight of the system of internal controls and the external financial reporting to the Audit Committee of the Board and responsibility for oversight of the risk management systems to the Risk Committee.

On behalf of the Board, the Risk Committee also conducts an annual assessment of the effectiveness of the Risk Function.

In addition, the Executive Risk Committee is the primary forum for Executive oversight and challenge of the risk and control environment across the business and is chaired by the Chief Risk Officer.

Scottish Friendly operates a 'three lines of defence model' in the management of risk so that there are clearly defined roles and responsibilities within our Risk Management Framework:

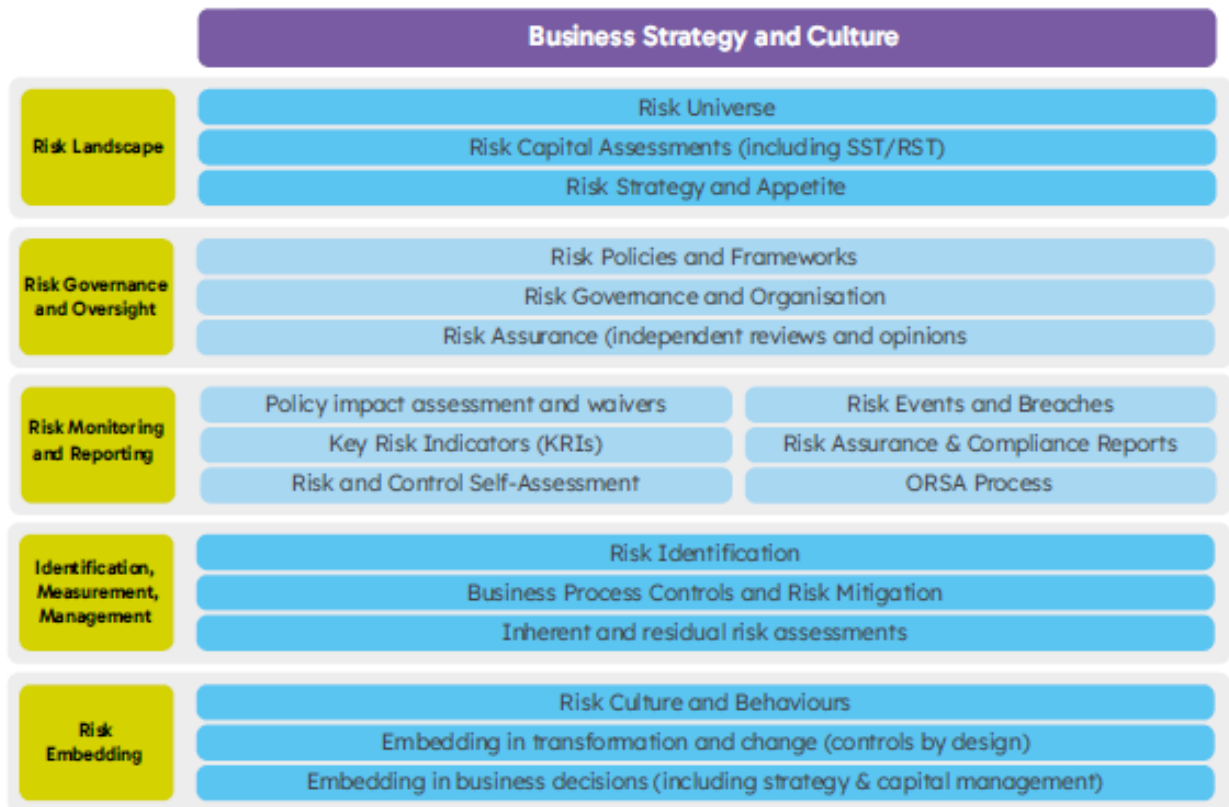

1. The First Line of Defence is the business areas across Scottish Friendly that are responsible for the identification and management of day- to-day risks and controls within their remit. The management of risk, monitoring of risk and the reporting of breaches of risk appetite are the responsibility of each Executive Risk Owner.
2. The Second Line of Defence consists of the Risk and Compliance Functions. The responsibilities of the Risk Function include the design and oversight of the Risk Management Framework, oversight of the identification and management of risk by the business, independent risk reviews, ownership of the quarterly RCSA, the ORSA methodology and processes, and promotion of a risk-aware culture. Responsibilities of the Compliance Function include preparing and delivering the annual compliance monitoring plan, assessing the systems and controls in place to prevent non-compliance with the regulatory requirements, including financial crime, monitoring and tracking regulatory developments, and to provide policy guidance and support to the First Line.
3. The Third Line of Defence is the Internal Audit function, which provides independent assurance of the adequacy and effectiveness of our risk and control environment. This is delivered via a cyclical and prioritised programme of risk-based audits covering all aspects of work undertaken in the First and Second Line business areas over a period of years.

Risk management is embedded in the duties and responsibilities of all employees, and it is the responsibility of managers to ensure that this approach is maintained, and the responsibility of the ERC to ensure that this is effectively monitored.

The Risk Management Framework

Scottish Friendly maintains a robust Risk Management Framework (RMF) that creates an effective risk management capability across the business which underpins both strategic and operational aspects of risk management.

The five key components of the RMF are:

SST = Stress and Scenario Testing RST = Reverse Stress Testing

Risk Landscape

The “Risk Universe” categorises all the risks to which the business is exposed, providing a common language for risk across the business and a structure for assessing and reporting risk.

Board approved Risk Appetite Statements set out the type and amount of risk that Scottish Friendly is willing to accept in pursuit of its strategic objectives and the three-year business plan.

Risk Governance and Oversight

Risk policies are in place to define the principles and standards for managing key risks across the business. Each risk policy is allocated an Executive Risk Owner (ERO) who is responsible for demonstrating ongoing compliance with the standards. The Risk Function provides oversight and challenge of this process.

Risk Monitoring and Reporting

Both first and second line operate a number of risk processes that support ongoing risk monitoring through management and risk committees.

A quarterly Risk and Control Self-Assessment (RCSA) process is in place for monitoring and reporting risk exposures. The Risk Function is responsible for consolidation of this information and regular risk reporting through appropriate governance structures.

This risk reporting is used to inform decision making, facilitate risk monitoring and ensuring pro-active action is taken to remain within risk appetite.

Own Risk and Solvency Assessment (ORSA) reporting sets out a forward-looking assessment of the risks faced by Scottish Friendly, associated capital requirements, and the continued adequacy of capital resources.

Risk Identification, Measurement and Management

Current and emerging risks are identified using a variety of techniques, including business risk self-assessments, risk workshops, horizon scanning and forward-looking Key Risk Indicators (KRIs).

A key component in the measurement of risk is the Pillar 2 capital assessment, which ensures Scottish Friendly has sufficient capital to support the risks taken in the course of delivering its business activities. Solvency risk appetite is primarily assessed with reference to the Pillar 2 solvency coverage ratio.

Risk management and mitigation measures are identified and implemented (e.g. reinsurance, capital management plans, control environments) by EROs to maintain risk exposure within appetite. Stress and scenario testing, including reverse stress testing, is used to test the impact of adverse scenarios on the capital coverage and business viability.

Risk Embedding

A strong, firm-wide risk culture is a key element of effective risk management. Scottish Friendly aims to deliver a culture of risk awareness through desired behaviours, key business decisions, day-to-day operations and change management.

The ORSA process and reporting, with its assessment of risk and capital implications, is considered a key process informing strategic and business decisions, including strategy setting, planning and capital management.

ORSA

The ORSA is a key process used in the identification, management and mitigation of risk. Each component of the risk management framework feeds into the ORSA, in order to enable an integrated approach towards risk management throughout Scottish Friendly.

The ORSA process is a dynamic process which links:

- Business strategy to the risks SFA takes and manages;
- the risks managed to the capital held against those risks; and
- the capital held to the strategy (for example, as either a potential enabler or constraint on writing new business and continued merger and acquisition activity).

The purpose of the ORSA is to:

- understand and manage Scottish Friendly's risks and associated controls;
- assess the risk profile against risk appetite;

- review forward looking assessment of future solvency, based on the business and strategic plans, which takes into account both the current risk profile and the risk profile following acquisitions;
- carry out stress and scenario testing (including reverse stress testing) to understand the impact of changes to the risk profile; and
- allow the Executive team and Board to make informed strategic decisions that impact the firm's risk profile.

In particular, the ORSA considers the extent to which the level and type of capital may be appropriate for risks identified over Scottish Friendly's business planning period. To this end the ORSA process involves a forward-looking assessment of capital requirements and capital resources over a five year period based on Scottish Friendly's risk profile and strategic plans. Within this projection the ORSA considers whether the level of capital coverage is compliant with Scottish Friendly's solvency risk appetite statements as well as the associated limits / triggers.

The ORSA is an integral part of the strategic decision-making process within Scottish Friendly and its results inform capital management, investment and product development decisions taken by the Executive and the Board. The ORSA is completed alongside, and is consistent with, the business planning process.

Responsibility for co-ordination of the ORSA process, and ownership of the ORSA policy, resides with the Chief Risk Officer. The key output of the ORSA process is an annual ORSA report which is reviewed by senior management and approved by the Board. An ORSA report is also produced following a significant change to the risk profile of the business. The Board approved ORSA Report is sent to the PRA.

Internal Control System

Each Function within the business is required to identify, in accordance with the risk management framework and risk policies, the risks arising from the specific activities undertaken within the function and to design and operate a suite of key controls which mitigate those risks.

For the purposes of assessing risk and the performance of key controls, Scottish Friendly maintains a suite of Risk Registers. The risk registers document the risk definition, inherent and residual risk ratings, effectiveness of design and operation of key controls and Executive Risk Owners.

Functional Risk Registers are in place to record and report on operational risks and controls across key processes within each business area. On a quarterly basis, the Executive Risk Owners for each functional area are required to submit their self-assessments of control effectiveness to the second line. The output of this process enables Executive Risk Owners at functional area level to confirm to their assessment of residual risk.

The output of the functional risk assessment is incorporated in the Corporate Risk Register ('CRR'). The CRR records and reports the inherent and residual risk to the business as a whole per risk category i.e. the CRR provides a 'total' view of the risk exposure across Scottish Friendly. The CRR is informed by underlying functional risk assessments, key risk indicators, risk events and breaches and other sources of information. It also incorporates a forward looking view as well as a current point in time of risk exposure.

The Risk Committee is responsible for overseeing the process as well as the output of the process. Each Executive Risk Owner is responsible for ensuring that the control self-assessment is completed

within the timeframe set by the Risk Function, as well as ensuring that evidence of testing is collated to support the confirmation that key controls are fit for purpose and that they are operating as intended. Where a failure is identified, action is required, and the Risk Function will track progress of remediation. On a quarterly basis, or more frequently, the Compliance function in conjunction with the Risk Function, reviews and challenges the assessments made by the Executive Risk Owners.

B.4 Internal Audit System

The following provides more information about Scottish Friendly's Internal Audit Function:

The Internal Audit Function (IAF) has the objective of providing management and the AC with an independent assessment of the effectiveness of internal control systems in the areas outlined and agreed in the Internal Audit Plan.

The Internal Audit Plan is prepared annually and approved by the AC. All IAF reports are presented to the AC.

Fundamental Principles under the PRAs regulatory framework

SFA incorporates the IAF and associated reporting lines into the organisational structure in a way that ensures that the IAF is free from influences that may compromise the IAF's ability to undertake its duties in an objective, fair and independent manner. The persons carrying out the IAF shall not assume any responsibility for any other function.

The IAF operates under the ultimate responsibility of, and reports to the AC and, where appropriate, cooperates with other functions in carrying out their roles.

The persons carrying out the IAF will have the necessary authority, resources and expertise to carry out their responsibilities. They will also have unrestricted access to all relevant information necessary to carry out their responsibilities. The persons performing the IAF will promptly report any major problem in their area of responsibility to the AC or Board.

The IAF shall:

- establish, implement and maintain an audit plan setting out the audit work to be undertaken, taking into account all activities and the complete system of governance of Scottish Friendly;
- take a risk-based approach in deciding its priorities;
- report the audit plan to the AC;
- issue recommendations based on the work carried out and submit a written report on its findings and recommendations;
- verify compliance with the decisions taken by the AC on the basis of those recommendations.

Where necessary, the IAF may carry out audits which are not included in the audit plan.

Relationship with Management/Other Stakeholders

IAF has a dual reporting role to Management for assistance and support in organising and conducting assignments, and to the AC for strategic direction and accountability. IAF will take account of the activities of external audit and external audit will review the planned activities of the function to assess the scope and relevance of the work to the external audit activity. This will facilitate a "joined up" approach where it is appropriate to do so.

Internal Audit cannot absolve management of responsibility for internal controls and must ensure it is not involved in the operation of controls.

IAF Process

Internal Audit will produce a proposed schedule of audits to be performed during the year, to be submitted to the AC for approval.

At the conclusion of each element of the Internal Audit Plan a draft report will be prepared. Auditees will be required to consider their element of the report for factual accuracy and to provide management responses for considering the recommendations, and where applicable, realistic target dates for implementation. Final reports will then be issued to auditees, the Executive Team and the AC.

B.5 Actuarial Function

Scottish Friendly's actuarial function has the following responsibilities:

- To fulfil the Chief Actuary SMF20 role, responsible for taking all reasonable steps to ensure the continued solvency, safety and soundness of Scottish Friendly, including actuarial investigations and regular valuations on the Solvency UK and ORSA reporting bases;
- Undertaking the capital calculations, and ensuring adequate provisions are available to meet policyholder benefits in all reasonably foreseeable circumstances in accordance with the risk appetite and taking due account of liquidity;
- Ensuring regulatory and legislative requirements are met, including annual review of the operation of the Principles and Practices of Financial Management (PPFM);
- Undertaking regular and ad hoc exercises including bonus investigations, calculations, reviews, analyses, profitability and experience monitoring, reinsurance arrangements, reports and regulatory submissions as required from time to time;
- Assisting in the Product Development processes. For example review of: product design, profit testing, specification and appropriate reinsurance arrangements; and
- Specifying and implementing claims calculations bases and methods including monitoring and application of Market Value Adjustments (MVAs) as and when required.

B.6 Outsourcing

Outsourcer Failure risk is defined as failure of outsourcing or supplier arrangements and failures within the administration undertaken by partners, including breach of contract.

Scottish Friendly seeks to manage its exposure to Outsourcer Failure risk by establishing minimum policy requirements set out in the Outsourcing and Key Supplier Policy and supporting practices/procedures that align with the agreed requirements. The Outsourcing Committee provides oversight controls to monitor the delivery of the services provided by outsourcers, suppliers and partners and ensures that appropriate action is taken to address any issues identified.

As at 31 December 2025, the following key co-sourced / outsourced functions are considered critical or important in line with the terms of 7.2 of Conditions Governing Business in the PRA Rulebook for regulated firms:

- Internal Audit (BDO LLP) (co-sourced arrangement)

In addition, there are also a number of other material outsourcers or key suppliers recorded on the Outsourcer Register:

- Thirteen contracts which involve an element of policy administration or related servicing activities (Aegon, OneFamily Limited, Neilson Financial Services, Nucleus Financial, Guardian Financial Services, Line Data, Uris Group Limited t/a Lutine Assurance Services, Certua Group Limited, Hannover Reinsurance, M&G Wealth, Union Insurance Services & Unisure Limited).
- Seven arrangements which cover investment management and related activities such as unit pricing, investment administration or asset management (Linedata, Bank of New York, Canada Life Limited, JP Morgan Chase & Co, Aberdeen plc, Schroders and Mobius Life Limited).

Three other arrangements, while not classified as material outsourcing, relate to the provision of IT services (Database Service Provider Global Limited, Pulsant Limited and FMP Global Ltd).

All of these outsourcers and key suppliers are located within the United Kingdom.

Other Information

There is no other material information to disclose in this situation.

C RISK PROFILE

The key risks facing Scottish Friendly are considered within the ORSA and presented to the Board on at least an annual basis. Data is presented to the Executive Risk Committee, Risk Committee and Board on a quarterly basis to highlight any significant movements in the risk profile of the business or the forward-looking risks.

The principal risks to which Scottish Friendly is exposed are underwriting, market, counterparty credit, and operational risks. Within underwriting risk, the principal exposure is to life underwriting risk, as well as a relatively small exposure to health underwriting risk. The RMF supports the identification, measurement, management, monitoring and reporting of these risks.

The figure below shows the split of the main risks to which Scottish Friendly is exposed. The capital requirements shown are based on the Standard Formula capital requirement for each risk:

Note that in the sub-sections below the capital requirements for the Manulife sub-fund are shown as nil. This is because the sub-fund distribution approach is that any losses would be directly reflected in lower payouts, with the strength of the sub-fund sufficient to absorb the prescribed Standard Formula stresses.

C.1 Market Risk

Market risk is the risk of adverse financial impact due to changes in fair values or future cash flows from fluctuations in interest rates, foreign currency exchange rates, equity prices and property values.

As at 31 December 2025, the total capital required in respect of market risk facing the business was £42.1m (2024: £34.9m). This has increased over the year, driven primarily by the increases in Equity, Interest rate, Currency and Property risk. This occurred due to higher unit-linked values as a result of new business sales and market growth over the year and an increase in the equity symmetric adjustment since YE24. The unit-linked fund rationalisation project, which was undertaken in 2025, has also allowed increased granularity of look-through in relation to unit-linked funds. Consequently this has improved Scottish Friendly's understanding of the underlying exposures, and resulted in an increase in the currency risk capital requirement in respect of the present value of future charges from unit-linked business.

The total market risk capital is comprised of the following risks across each of the sub funds:

Business Block	SF Main Fund	Scottish Legal	M&GM	Manulife	Aggregate
	£m	£m	£m	£m	£m
Interest rate risk	5.8	0.0	0.0	0.0	5.8
Equity risk	28.9	1.1	1.9	0.0	31.9
Property risk	1.6	0.0	0.2	0.0	1.8
Spread risk	0.6	0.5	1.8	0.0	2.9
Currency risk	8.4	0.0	0.0	0.0	8.4
Other market risk	0.0	0.0	0.0	0.0	0.0
Diversification	(8.3)	(0.1)	(0.3)	0.0	(8.6)
Total market risk	37.1	1.5	3.5	0.0	42.1⁵

The primary driver of market risk is “equity risk”. This risk arises from the equities held to back with-profits asset shares, whereby a fall in equity values results in an increase in the cost of guarantees. In addition, equity risk arises from unit-linked business where a reduction in equity values resulting in a corresponding reduction in the expected future income stream to Scottish Friendly.

Further quantitative analysis on the composition of Scottish Friendly’s investment portfolio can be found within Note 14 – Note 18 inclusive of the 2025 Annual Report and Financial Statements.

In addition, further quantitative analysis on the credit quality of Scottish Friendly’s investments can be found within the “Credit Risk” section of Note 36 of the 2025 Annual Report and Financial Statements.

Risk concentrations

Scottish Friendly avoid concentrations of market risk through the design of its investment strategy. Scottish Friendly primarily invests in a range of OEICs and other similar collective investment vehicles which maintain a balanced and diversified investment strategy and avoid material exposures to single names. The Investment Function also undertakes analysis at an appropriate frequency to consider the aggregate exposure across all of Scottish Friendly’s investments and ensure that there are no material single name exposures which are outside of risk appetite. The largest single name exposure is to the UK Government through holdings in gilts.

Risk mitigation

Market risk is mitigated through the selection of assets to closely match key characteristics - such as duration and currency - of Scottish Friendly’s liabilities. Scottish Friendly also maintains a portfolio of derivatives, primarily swaptions and exchange traded futures and forward contracts, which are held to mitigate exposure to interest rate risk, equity risk and currency risk which arises from certain liabilities or features of investment strategy.

Scottish Friendly’s non-linked asset portfolio is managed on a day-to-day basis by external specialists within JP Morgan and Aberdeen. These managers are permitted to make short-term tactical decisions, within pre-defined upper and lower bounds, to actively manage and mitigate market risks as the external environment develops. The Investment Function and Investment Committee provide close oversight over these external managers, with formal reporting to the Investment Committee on a quarterly basis.

⁵ Totals may not match the summing up for individual rows due to rounding.

C.2 Underwriting Risk

Underwriting risk is the risk of potential losses arising from inaccurate assessment of the risks entailed in writing an insurance policy. This is mitigated by the provision of reinsurance arrangements, limits on cover and explicit exclusions.

In accordance with the requirements of the PRA rulebook, underwriting risk is calculated separately for life insurance business and health insurance business.

As at 31 December 2025, the total capital required in respect of the life underwriting risk exposure was £69.6m (2024: £61.3m). This is comprised of the following risks across each of the sub funds:

Business Block	SF Main Fund	Scottish Legal	M&GM	Manulife	Aggregate
	£m	£m	£m	£m	£m
Mortality	10.8	0.0	0.3	0.0	11.1
Longevity	2.2	0.2	5.8	0.0	8.2
Disability	0.0	0.0	0.0	0.0	0.0
Lapse	40.4	0.0	5.5	0.0	45.9
Expense	24.1	0.2	1.8	0.0	26.1
Revision	0.0	0.0	0.0	0.0	0.0
Catastrophe risk	0.9	0.0	0.0	0.0	0.9
Diversification	(19.0)	(0.1)	(3.5)	0.0	(22.6)
Total life underwriting risk	59.5	0.3	9.9	0.0	69.6⁶

The corresponding exposure to health underwriting risk was £1.1m (2024: £1.3m), split as set out in the table below:

Business Block	SF Main Fund	Scottish Legal	M&GM	Manulife	Aggregate
	£m	£m	£m	£m	£m
Health Mortality	0.0	0.0	0.0	0.0	0.0
Health Longevity	0.0	0.0	0.0	0.0	0.0
Health Disability	1.0	0.0	0.0	0.0	1.0
Health Expense	0.1	0.0	0.0	0.0	0.1
Health Revision	0.0	0.0	0.0	0.0	0.0
Health Lapse	0.2	0.0	0.0	0.0	0.2
Diversification	(0.2)	0.0	0.0	0.0	(0.2)
Total health underwriting risk	1.1	0.0	0.0	0.0	1.1

The level of underwriting risk capital has increased from 2024. This is primarily due to an increase in the mass lapse stress due to updates in expense assumptions which increased the expected future

⁶ Totals may not match the summing up for individual rows due to rounding.

profitability of some product lines. Furthermore, the expense stress has increased due to an increased level of expenditure over the year.

Lapse risk remains the most significant exposure. Scottish Friendly's lapse capital is based on its exposure to a "mass lapse" event, under which there is a sudden and significant exit of business that is expected to be profitable in the future.

Risk concentrations

Scottish Friendly's diverse back-book of insurance contracts avoids any material concentrations arising in respect of underwriting risk – in particular, this offers Scottish Friendly diversification across product type, geography, age and gender.

Scottish Friendly also makes extensive use of reinsurance – both in respect of the back-book and in respect of new business - to avoid concentration exposure to very large policies, and to avoid creating an exposure to a single product line.

Scottish Friendly does actively sell a number of products which give rise to lapse risk. This is the most material underwriting risk. Whilst this risk is not concentrated on a single line of business or single target market, it has been identified that certain external events, such as a deep and prolonged recession in the UK, could cause this risk to crystallise concurrently across multiple lines of business. This is considered as part of the annual ORSA assessment and capital is held to ensure that Scottish Friendly is able to withstand a very extreme mass lapse event occurring.

Risk mitigation

Underwriting risk arising from selling new business is primarily mitigated in accordance with the insurance risk management policy, and, more generally, the product design / new business sales processes, which are specifically designed to identify and mitigate any underwriting risks which are outside of Scottish Friendly's risk appetite.

Scottish Friendly also makes extensive use of reinsurance to cede underwriting risks to third party reinsurers. This acts as a mitigant to the concentration risk which could otherwise arise from very large claims on the protection book.

There are risks which, by the nature of operating insurance business, cannot be fully mitigated. The Actuarial and Commercial Functions undertake regular close monitoring of emerging experience which would allow corrective action to be taken if it became clear that experience was emerging in a manner which is not consistent with Scottish Friendly's expectations.

The business strategy also offers a mitigant against underwriting risk, by ensuring diversification is achieved across product lines and target markets.

C.3 Counterparty Default Risk

Counterparty default risk is the risk of financial loss as a result of the default or failure of third parties to meet their obligations.

As at 31 December 2025, the total capital required in respect of counterparty risk facing the business was £10.1m (2024: £8.5m). This increase is primarily due a material increase in the reinsurance asset as a result of changes to best estimate morbidity assumptions. This is comprised of the following risks across each of the sub funds:

Business Block	SF Main Fund	Scottish Legal	M&GM	Manulife	Aggregate
-----------------------	---------------------	-----------------------	-----------------	-----------------	------------------

	£m	£m	£m	£m	£m
Type 1	8.1	0.0	0.6	0.0	8.8
Type 2	1.7	0.0	0.0	0.0	1.7
Diversification	(0.4)	0.0	0.0	0.0	(0.4)
Total counterparty risk	9.4	0.0	0.6	0.0	10.1

Note:

- Type 1 details the exposures to other insurance companies (through reinsurance arrangements) and to banks.
- Type 2 details all remaining exposures.

The primary driver of counterparty default risk refers to the risks that reinsurers or banks are unable to satisfy their obligations and cause financial loss. Only high-quality counterparties are sought as counterparties, collateral arrangements are put in place where appropriate and concentration risk is managed by using a number of banks and reinsurers to spread the risks.

Risk concentrations

Scottish Friendly's counterparty risk appetite places an upper limit on the level of counterparty risk exposure which is permitted from a single counterparty. This applies to reinsurers, banks, third-parties to derivative contracts and debtors. The position against risk appetite is monitored by the Technical Review Committee on a monthly basis, which would allow corrective to be taken if it was identified to be likely that a counterparty exposure may breach the risk appetite trigger level.

The most material counterparty risk concentrations arise from Scottish Friendly's reinsurers, to whom underwriting risk has been ceded in the past as well in respect of new business. These concentrations are closely monitored and scenario testing is conducted as part of the annual ORSA assessment to assess the sensitivity of the capital position to key counterparties, both now and in the future as a result of writing new business. This is in turn used to inform business strategy and guide the selection of new counterparties if necessary.

Risk mitigation

Counterparty risk is primarily mitigated through ensuring compliance with Scottish Friendly's risk appetite statements as well as the counterparty risk management policy. In particular, this requires all material counterparties to have a minimum credit rating and also limits the maximum exposure permitted to any single name.

The Finance Function monitor the counterparty exposures and provide a monthly credit report to the Technical Review Committee which highlights the position against risk appetite and would permit timely action to be taken if a counterparty's credit quality was deteriorating.

In addition, a number of counterparty exposures are also mitigated by the third-party providing collateral to Scottish Friendly – either by posting assets into a custody account, or by way of granting a legal charge to Scottish Friendly over the third-party's balance sheet.

C.4 Liquidity Risk

Liquidity risk is the risk that loss or adverse circumstances will result in the inability of Scottish Friendly to meet its liabilities when they fall due.

Liquidity risk is subject to extensive management oversight and reporting. Analysis of projected cash inflows and outflows is performed by Finance with input from Actuarial on a monthly basis, and the projected liquidity position is monitored through regular risk reporting. Liquidity requirements are considered over one-month and three-month time horizons.

Reinsurance claims payments and schedules are subject to regular monitoring and any issues raised at regular relationship management meetings. The Investment Committee provides oversight of the asset allocation and ultimately maintains a strategy that includes a proportion of the portfolio that is very liquid e.g. listed equities, gilts, which if required, could be sold to provide additional liquidity during stressed periods.

Given the nature of this risk and the controls in place, Scottish Friendly did not hold any capital against this risk as at 31 December 2025.

Further quantitative analysis on the maturity profile of Scottish Friendly’s liabilities can be found within the “Liquidity Risk” section in Note 36 of the 2025 Annual Report and Accounts.

C.5 Operational Risk

Operational risk is the risk of loss or adverse consequences for the business resulting from inadequate or failed internal processes, people or systems, cyber risk, or from external events.

The operational risk capital requirement is calculated in line with the prescribed Standard Formula basis, with the results shown below. The capital requirement is calculated based on the earned premiums, the technical provisions, and the expenses on unit linked business.

As at 31 December 2025, the total capital required in respect of operational risk facing the business was £13.1m (2024: £13.0m). The operational risk in respect of the Manulife fund is held in the SF Main Fund. Operational risk is comprised of the following capital requirements across each of the sub funds:

Business Block	SF Main Fund	Scottish Legal	M&GM	Manulife	Aggregate
	£m	£m	£m	£m	£m
Total operational risk	9.9	0.3	2.9	0.0	13.1

The level of operational risk capital is broadly unchanged from that in 2024. This has increased slightly as a result of increased new business premiums.

Risk mitigation

The nature of operational risk means that it is most effectively mitigated through effective first line of defence controls within procedures and, where appropriate, automated processes to minimise the risk of human error. The internal control system which is operated by Scottish Friendly to mitigate operational risk is described within section B3.

In addition, Scottish Friendly also has insurance policies which further mitigate against certain operational risks which are not otherwise well mitigated through a robust control environment.

In addition to the Standard Formula operational risk capital requirements, Scottish Friendly also monitors operational risk using bespoke stress and scenario modelling within the ORSA, calibrated using inputs from Scottish Friendly’s Executive management team.

C.6 Risk Sensitivities

Scottish Friendly conducts a number of stress tests to assess the implications of various scenarios on the capital position of the business. These are performed as part of the ORSA process which is completed at the same time as the Business Planning and, longer-term, Strategic Planning processes.

The following stress scenarios were defined and developed following input from both the Executive and Board. These were tested quantitatively within the ORSA:

- Combined economic and demographic scenario
- A yield curve twist and high inflation
- High profile operational failure scenario
- Counterparty downgrade following an increase in mortality experience
- Liquidity scenario
- Climate change scenario

The scenarios consider the immediate impact to the capital position e.g. payment of remediation and costs, as well as the longer-term impact on revenues e.g. impacting ongoing sales volumes. The exercise concluded that Scottish Friendly remains well capitalised under an appropriate range of adverse scenarios and that Scottish Friendly is comfortably able to meet its solvency capital requirement and maintain a solvency coverage ratio well in excess of 100% without deploying any additional management actions.

Additional management actions, beyond those modelled in the SCR calculation, have not been incorporated in the scenario assessment, as the solvency position does not necessitate the use of the actions to maintain solvency. In reality, such actions would be taken if the solvency of Scottish Friendly was under threat.

In addition to the quantitative analysis detailed above, a number of further scenarios were also considered qualitatively within the ORSA, in order to assess the controls and other risk mitigants in place within the business, and to highlight any areas where further action is required. These scenarios include strategic change activity causing severe strain, an operational resilience failure scenario, a partner / outsourcer failure scenario and a small number of emerging risk scenarios. Finally, reverse stress tests were also completed by the business based on input from the Executive and the Board.

Further quantitative analysis which demonstrates the sensitivity of the capital position to insurance and market risks can be found within Note 36 of the 2025 Annual Report and Accounts.

C.7 Other Risks

Emerging Risks

The ORSA considers the “emerging risks” to which Scottish Friendly is exposed. Emerging risks are typically characterised by a high degree of uncertainty and generally fall into two categories. They are either 1) new risks which may develop in the future into a material exposure for Scottish Friendly; or 2) existing risks which begin to present in a new or different way from previously understood.

Emerging risks may be known to some extent, but they may never materialise, or might not have an impact for several years. Alternatively, they might crystallise rapidly, with little time to respond. Scottish Friendly operates an emerging risk process to identify new emerging risks, as well as to determine whether existing emerging risks have become more or less likely to crystallise in the future.

This process is used to ensure that timely action can be taken, as necessary, to mitigate the risk prior to it impacting Scottish Friendly. Examples of the emerging risks considered in the ORSA include risks related to the external business environment such as the continuing evolution of cyber risks and of the regulatory and political landscape.

D VALUATION FOR SOLVENCY PURPOSES

Valuation Basis

The regulations set out within the PRA rulebook require Scottish Friendly's assets and liabilities to be measured in accordance with the principles of an arm's length transaction between knowledgeable willing parties using market consistent valuation methods. In the case of assets, this is described as "fair value".

The differences between the Statutory Accounts and balance sheet which is calculated in accordance with the requirements of the PRA rulebook (the "regulatory balance sheet") as at 31 December 2025 are shown below. As the Statutory Accounts are principally valued at fair value, the differences between the regulatory balance sheet and the Statutory Accounts are limited in nature.

The differences between the Statutory Accounts and regulatory balance sheet are shown below as at 31 December 2025:

	Statutory Accounts £'000	Adjustments £'000	Regulatory Balance Sheet £'000	Note
Property & Equipment	4,615	0	4,615	
Investments	3,596,718	(260,440)	3,336,278	1 & 2
Derivative assets	4,519	0	4,519	
Reinsurance	569,859	280,562	850,422	1
Cash	98,541	(20,127)	78,414	2
Pension scheme surplus	11,236	(11,236)	0	3
Negative Goodwill	(23,235)	23,235	0	4
Other	45,917	0	45,917	6
Total Assets	4,308,171	11,993	4,320,164	
Technical Provisions	(4,017,461)	6,092	(4,011,368)	5
Derivative liabilities	(3,090)	0	(3,090)	
Other	(92,720)	2,809	(89,911)	3 & 6
Total Liabilities	(4,113,271)	8,901	(4,104,370)	
Net Assets	194,900	20,894	215,794	

Explanatory Notes:

1. There is a unit-linked reinsurance agreement in place with Mobius Life. Within the Statutory Accounts the underlying investments held by the Mobius policyholders are recognised directly, whereas on the regulatory balance sheet this is recognised as a reinsurance asset. This results in a large switch, £280.5m, from investment assets to reinsurance assets. This is entirely presentational and there is no impact on the net position.
2. Certain cash assets held in respect of unit-linked contracts of insurance (£5.8m) are recognised as cash on the Statutory Accounts basis and as investments on the regulatory balance sheet.

3. The pension scheme surplus is restricted on a regulatory basis to be in line with the contribution of the pension scheme to the capital requirements. There is no such restriction in the Statutory Accounts. This results in a valuation difference of £11.2m. The related tax charge of £2.8m, recognised as part of the “other” liabilities within the Statutory Accounts, is not recognised on the regulatory balance sheet, as the impact is already reflected in the surplus restriction.
4. A £23.2m negative goodwill liability is recognised on the Statutory Accounts balance sheet. This recognises that the price paid for the acquisition of business from Canada Life Limited and Mobius Life Limited was less than the fair value of the net assets acquired. This amount is amortised over time as the capital requirements run-off and expected profits from this book emerge. Intangible assets such as goodwill are not recognised on the regulatory balance sheet in accordance with PRA rulebook.
5. In the Statutory Accounts the financial liability for investment contracts is valued based on the carrying value of the assets and liabilities that are held to back the contract, plus an additional amount equal to the present value of excess future policy costs over future charges. On a regulatory basis these contracts are valued equal to the expected future cash flows (including allowing the recognition of future charges where they are projected to exceed future expenses) plus a risk margin. This gives rise to a valuation difference of £6.1m.
6. An aggregate deferred tax liability is shown in the statutory accounts, but for regulatory reporting this deferred tax liability is notionally split between the sub-funds. As the Manulife sub-fund is in a notional deferred tax asset position this results in a switch of £45k between “other assets” and “other liabilities”, with no change in the aggregate net position.

D.1 Assets Valuation

Scottish Friendly’s regulatory valuation principles (including the bases, methods and main assumptions) for each asset class are set out below. Unless otherwise stated (i.e. where there are differences to the Statutory Accounts value column) the valuation methods for UK GAAP are consistent with the valuation methods of the Solvency UK regulations. Further details on the UK GAAP valuation principles are set out in the Notes to the Annual Accounts in the Scottish Friendly Annual Report and Financial Statements for the year ended 31 December 2025

There have been no significant changes to the valuation principles set out below during the year.

Assets carried at fair value in the regulatory balance sheet are categorised based upon the valuation techniques used, as follows:

- QMP – quoted market price in active markets for the same assets.
- QMPS – quoted market price in active markets for similar assets.
- AVM – alternative valuation methods.

An active market exists where transactions take place with sufficient frequency and volume to provide pricing information on an ongoing basis. Some of Scottish Friendly’s financial instruments are valued using alternative valuation methods, which utilise a combination of observable and non-observable market inputs (please see section D.5).

Property, plant and equipment

Land and buildings are valued at fair value. This is the same basis as the Statutory Accounts for regulatory purposes. A formal valuation of 15-17 Blythswood Square, completed by a professional independent valuer, takes place every three years and was most recently completed ahead of the 31 December 2024 reporting period.

Plant and equipment are valued at their net realisable value. This is considered by management as an appropriate proxy for fair value of these assets.

Investments

Investments including those held to cover linked liabilities are stated at the current market value as described below:

- Shares and other variable-yield securities, units in unit trusts and shares in OEICs are shown in the balance sheet at market value at the balance sheet date.
- Debt securities and other fixed income securities are valued at the current market value at the balance sheet date.
- Investments in Group undertakings (detailed as Participations under the PRA rulebook) are valued using the adjusted equity value in accordance with the requirements of Article 13.1(b) and 13.3 of the Delegated Acts (2015/35/EU).
- Derivatives are shown in the balance sheet at Fair Value and marked to market.
- Property funds acquired as part of the acquisition from Canada Life are held in the Private Portfolio Funds, and the underlying properties are revalued annually.

As at 31 December 2025 the following investments were held by Scottish Friendly (values exclude the cash held in respect of unit-linked contracts of insurance):

	QMP £000	QMPS £000	AVM £000	Total £000
Property held for own use	-	-	3,100	3,100
Government Bonds	345,269	-	-	345,269
Corporate Bonds	-	73,328	-	73,328
Structured notes	-	-	2,295	2,295
Collective Investments Undertakings	-	-	433,774	433,774
Derivatives assets	-	3,771	748	4,519
Assets held for index-linked and unit-linked contracts	282,373	-	2,454,608	2,736,981
Total financial assets	627,642	77,099	2,894,525	3,599,266
Derivative liabilities	-	(3,090)	-	(3,090)

Collective Investment Undertakings

The Collective Investment Undertakings above exclude the assets held for Flexible Income Annuities, which are included as unit linked assets in the Statutory Accounts. In the Solvency II balance sheet these are treated as a Collective Investment Undertaking so the corresponding amount in the Solvency II balance sheet is £814.8m.

Reinsurance assets

The recoverables from reinsurance contracts relate to annuity business, which is almost entirely reinsured, protection business, of which a large proportion is reinsured, and reinsurance of certain investment funds (including the pension funds which transferred from Mobius Life Limited). The reinsurance arrangements involve a number of different reinsurers. Regular monitoring is carried out to assess the ongoing risk associated with these arrangements.

The reinsurance assets for Solvency UK reporting and the Statutory Accounts have been calculated on best estimate basis in line with Solvency UK requirements. An allowance is made for expected losses on reinsurance recoverables due to counterparty default.

Reinsurance contracts in respect of investment business which do not transfer risk to the third party are not recognised as a reinsurance asset in the Statutory Accounts. Instead, the Statutory Accounts looks through to the underlying assets held by policyholders within 'assets held for index-linked and unit-linked contracts'.

Cash and Cash Equivalents

Cash and cash equivalents comprise cash at bank and cash in hand as well as short-term deposits with a maturity of three months or less and known redemption values which are held to manage short-term operational cash requirements on origination. The valuation in the Statutory Accounts basis is materially consistent with a fair value and therefore the valuation is unadjusted in the Solvency UK balance sheet.

Other Assets

These include sundry debtors and prepayments and are recorded at amortised cost. This approximates the fair value valuation basis under Solvency UK for these assets. The Statutory Accounts also include a negative goodwill asset, which was recognised on the transfer of a block of business from Mobius Life Limited and a further amount recognised as part of the transfer of the Canada Life book. As an intangible asset, this is not recognised on the Solvency UK basis.

D.2 Technical Provisions

The Technical Provisions represent the best estimate liability of future policyholders along with a Risk Margin. The Risk Margin is intended to reflect the difference between the amount which must be paid to another insurer to meet the future obligations for a block of policies and the best estimate value of liabilities for the same block of policies.

Best estimate assumptions

The key demographic assumptions (expense, mortality, longevity, morbidity and persistency) are based on the experience investigations carried out in late 2025 and presented to the Audit Committee of the Board in December 2025 and January 2026.

The most material best estimate demographic assumptions are reviewed at least annually and less material assumptions are reviewed on a three-yearly rolling cycle. The exception to this is for longevity analysis where the assumptions are reviewed at least every two years. Assumptions are set based on relevant internal experience where this is available, robust and credible. Where there is no credible internal experience, relevant external information will be sourced and used. This may include population experience or reinsurer rates.

Assumptions are set to reflect expected experience for a given product/group of products. Products are typically grouped where these have similar features, in order to ensure that assumptions are based

on a credible volume of data. Assumptions are rounded, where appropriate, to avoid spurious accuracy.

The analysis window over which data points are grouped into years runs from March to March. This means that the assumptions used at year-end 2025 are based on data up to 31 March 2025. Experience is generally analysed over a three-year analysis window, with the exception of longevity experience which is analysed over a five-year period given the longer-term nature of the assumption.

Best estimate expense assumptions have been set to reflect the expected long-term administration costs for the in-force policies, based on the latest business plan. Short-term reserves have also been established to reflect some items of cost which Scottish Friendly expect to incur in the coming years as part of developing the business, but which are not expected to continue in the longer term.

The key economic assumptions used to calculate technical provisions (e.g. yield curves and volatilities) are based on relevant market data at 31 December 2025. The risk-free yield curve is published by the PRA.

Methodology

The key components of the Technical Provisions are the with-profit benefit reserves, the cost of guarantees, non-profit reserves, unit linked reserves, non-unit reserves and the Risk Margin. The with-profit benefits reserves (i.e. the asset share for with-profits business) may be calculated using a retrospective or prospective approach. The cost of guarantees are calculated stochastically for both with-profit and unit linked business, the non-profit reserves and non-unit reserves are all calculated using a deterministic discounted cashflow approach.

The retrospective approach involves rolling the asset share forward month-on-month allowing for premiums, investment returns, charges and any other relevant factors.

The prospective approach involves discounting the expected payout to policyholders (including allowance for future bonuses) to the valuation date, allowing for future expenses and premiums.

The with-profits benefit reserves at 31 December 2025 are all valued using a retrospective approach except for the with-profits business held in the Manulife sub-fund, which is valued using a prospective approach based on the assets available in the sub-fund (after allowance for the non-profit business in that sub-fund), reflecting the expectation that all free assets will be distributed to the Manulife with-profits policies over time.

Risk margin

The Risk Margin is calculated by projecting forward the capital requirement held for non-hedgeable risks – as defined within the PRA rulebook regulations – using a risk driver approach. Risk drivers were selected to provide an appropriate proxy for the evolution of the capital held for each risk (for example, change in the number of in-force policies or change in the BEL).

The resulting projected capital requirement is then adjusted to reflect the time decay parameter set out in the PRA rulebook and multiplied by the cost of capital rate set out in the PRA rulebook (currently 4%), before being discounted to the valuation date.

Other

Scottish Friendly does not use the matching adjustment ('MA') or volatility adjustment ('VA'), nor does it avail of any of the transitional measures set out within the PRA rulebook (including the Transitional Measures on Technical Provisions), when calculating its technical provisions.

	2025 £000	2024 Restated £000
Total Best Estimate Liability	3,998,497	3,861,185
<i>BEL - Health</i>	6,588	8,996
<i>BEL – Life</i>	1,614,781	1,485,908
<i>BEL - Unit-linked and index linked</i>	2,377,128	2,366,281
Total Risk Margin	12,872	11,313
<i>Risk Margin - Health</i>	40	57
<i>Risk Margin - Life</i>	8,035	7,086
<i>Risk Margin - Unit-linked and index linked</i>	4,797	4,169
Technical Provisions	4,011,368	3,872,498

Restatement

The Technical Provisions as at 31 December 2024 have been restated to correct an error which was identified within an actuarial model where mortality and persistency assumptions used to value a specific line of business had not been updated correctly. This error resulted in a material misstatement of both the Technical Provisions. There was an offsetting change in the reinsurance asset of broadly the same magnitude, and consequently this restatement had an immaterial impact on Own Funds. The restated position has been used as the prior year comparative throughout sections D and E:

£000	2024 as previously reported	Restatement	Restated 2024
Technical Provisions – Life	1,410,004	75,904	1,485,908
Reinsurance Asset	1,034,026	75,747	1,109,773
Unrestricted Own Funds	241,211	(158)	241,054
Ring Fencing Restriction	(106,488)	0	(106,488)
Own Funds	134,723	(158)	134,566

D.3 Uncertainties within the Technical Provisions

Actuarial assumptions are inherently judgemental in nature and the application of this judgement, alongside the potential volatility in future experience as a result of the challenging external environment, gives rise to a degree of uncertainty within the Technical Provisions.

The key areas of uncertainty within technical provisions which were considered by the Audit Committee during the year-end 2025 assumption were:

- Impact of COVID-19 and subsequent NHS backlog on demographic assumption setting – where it was concluded that there is no obvious outliers in recent data, and so all observed experience data has been used to set mortality, morbidity and longevity assumptions.
- Allowance for future impacts of climate change – where Scottish Friendly does not believe that it is necessary to make any adjustment to best estimate assumptions to allow for the impact of climate change risk at present.

In addition, a number of factors were considered for specific demographic assumptions - most significantly in relation to the reviewable whole of life business and some pensions lines of business where age-specific assumptions have been adopted this year-end.

Further quantitative analysis which demonstrates the sensitivity of Technical Provisions to changes in key assumptions can be found within Note 36 of the 2025 Annual Report and Accounts.

D.4 Other Liabilities

The other liabilities are analysed below. These are recorded at amortised cost, with the exception of outstanding claims which is measured on a best estimate of the expected cashflows resulting from all outstanding obligations. In each case, the recorded value approximates the fair value valuation basis under Solvency II for these liabilities.

Claims outstanding is measured on a best estimate of the expected cashflows resulting from all outstanding obligations. This is based on observed experience and relies on judgements about how to interpret that experience and how that experience may change in the future. An increase in the experience of making payments to customers by 10% would increase outstanding claims by approximately £0.9m and a decrease in the experience of making payments to customer by 10% would reduce outstanding claims by approximately £0.2m.

The total amount of other liabilities is £92.7m prior to the application of any Solvency UK adjustments. The key liabilities within this total are detailed in the table below:

	2025 £000	2024 £000
Deposits from reinsurers	5,235	5,164
Claims outstanding	32,814	39,886
Creditors arising out of Direct Insurance Operations	13,460	13,730
Other Creditors	7,244	5,584
Accruals and Deferred Income	20,540	17,807
Provisions for liabilities	13,427	7,157
Total	92,720	89,328

Alternative Valuation Methods

Some of Scottish Friendly's financial instruments are valued using alternative valuation methods, which use a combination of observable and non-observable market inputs. All of the alternative valuation methods described below follow accepted market practice. The methods are consistent with the permitted alternative valuation methods under SII as set out in Article 10(5) - 10(7) of the Solvency II Delegated Regulation.

There have been no significant changes in the recognition, measurement or valuation base used for financial assets and liabilities during the reporting period.

Asset	AVM £000	Alternative Valuation Method	Assumption
Property held for own use	3,100	Royal Institution of Chartered Surveyors ('RICS') Appraisal and valuation methodology.	As per RICS valuation manual and based on professional judgement of independent valuers.

Structured notes	2,295	Combination of observable and non-observable market inputs including modelling.	The valuation is based on the discounted value of the estimated future cashflows, including a proportion of the shared appreciation on the underlying property assets.
Collective Investments Undertakings	433,774	Prices are obtained from published information representing the value at which units could be redeemed via the investment manager.	None
Derivative assets	748	Market approach, which uses prices and other relevant information generated by market transactions involving identical or similar assets, liabilities or group of assets and liabilities.	Various assumptions used depending on derivative, including interest rate curve, discount curve and implied volatility.
Assets held for index-linked and unit-linked contracts	2,454,608	Prices are obtained from published information representing the value at which units could be redeemed via the investment manager.	For property assets, as per RICS valuation manual and based on professional judgement of independent valuers.

Collective Investment Undertakings and Assets held for index-linked and unit-linked contracts consists of holdings in open-ended funds.

The fair value of daily priced pooled investment funds is calculated as equal to the observable unit price. This is obtained from published information where available, otherwise the fair values of underlying assets and liabilities held by the fund, divided by the total number of units at the valuation date is used to calculate the unit price. Unit pricing of managed pooled investment funds does not meet the Solvency II criteria for QMP or QMPS categorisation since prices are not listed on a regulated market or multilateral trading facility.

Unlisted equities are valued under the Equity and Venture Capital ('IPEV') valuation guidelines. The valuation of these securities is largely based on inputs that are not based on observable market data, and accordingly these instruments are categorised as AVM. Where appropriate, reference is made to observable market data.

Derivative positions are valued using observable market inputs and are subject to price verification against independent sources which are used to determine plausible alternative valuation ranges.

D.5 Other Material Information

The information presented in section D provides a true and fair view of the valuation of Scottish Friendly as completed in accordance with the requirements stated in the PRA rulebook.

E CAPITAL MANAGEMENT

E.1 Own Funds

Scottish Friendly's capital management objectives are:

- To protect Scottish Friendly's financial strength, providing security to policyholders;
- To comply with the regulatory capital requirements as stated in the PRA rulebook;
- To enable smoothing of investment returns and payouts; and
- To ensure that Scottish Friendly's capital position is sufficient to enable it to invest in the development of the business in order to fulfil its core strategic objectives as determined by the Board.

The capital position of Scottish Friendly is monitored on a regular basis by the Risk Committee as part of the Risk Management Framework and is also reviewed formally by the Board. Scottish Friendly has not breached the PRA's capital requirements at any point in the current or prior year.

Composition of Own Funds

Scottish Friendly's capital comprises of its Own Funds. As a mutual these comprise 100% of the profits not yet allocated to members. All of Scottish Friendly's Own Funds are Tier 1 capital. The following table provides a breakdown of the components of the Own Funds.

	2025	2024 Restated
	£000	£000
Own Funds	126,649	134,566
Tier 1	126,649	134,274
Surplus Funds	215,794	241,054
Reconciliation Reserve	(89,145)	(106,488)
Tier 2	-	-
Tier 3	-	292
% Tier 1	100%	100%

The Surplus Funds item represents the excess of the assets over the liabilities in Scottish Friendly and is the surplus that has not yet been distributed to our participating members. The reconciliation reserve reflects the ring-fencing restriction relating to the closed sub-funds, as described below.

Reconciliation to Funds for Future Appropriations shown in the financial statements

There is a difference between the net assets as shown in the financial statements and the excess of assets over liabilities shown on the regulatory balance sheet. This is primarily due to the recognition of an intangible negative goodwill on the Statutory Accounts basis which is not recognised on the regulatory balance sheet in accordance with the requirements of the PRA rulebook. This reflected the transfer of business from Canada Life Limited and Mobius Life Limited. In addition, in accordance with the PRA rulebook, the level of pension scheme surplus is restricted. Finally, within the Statutory Accounts a different valuation approach is used for investment contracts in line with the requirements stated in the relevant accounting standards. As at 31 December 2025, excess assets over liabilities were £194.9m on a Statutory Accounts basis and £215.8m as determined in accordance with the requirements of the PRA rulebook (before ring-fencing).

Change in Own Funds

The following table shows the change in Scottish Friendly's Own Funds from 31 December 2024 to 31 December 2025.

	2025
	£000
Opening Own Funds	134,566
Increase/(Decrease) in Total Assets	377,534
(Increase)/Decrease in Technical Provisions	(398,273)
(Increase)/Decrease in Current Liabilities	(4,520)
Total	109,306
Decrease/(Increase) in ring-fencing of available capital	17,343
Closing Own Funds	126,649

The assets and liabilities in the table above are shown net of reinsurance.

Ring Fenced Funds

The excess of assets over liabilities is reduced to reflect the impact of ring fencing of individual sub funds. The sub funds are closed to new business and they have separate equity backing mixes resulting in different investment experiences and bonus policies. The excess assets over liabilities in the sub funds are not treated as transferable.

The impact of this on the Own Funds position is shown below. These sub funds are the Scottish Legal Life sub fund, the M&GM sub fund and the Manulife sub fund.

	2025	2024 Restated
	£000	£000
Excess assets over liabilities	215,794	241,054
Adjustment for restrictions due to ring fencing	(89,145)	(106,488)
Own Funds	126,649	134,566

E.2 Solvency Capital Requirement and Minimum Capital Requirement

Scottish Friendly uses the Standard Formula as the basis for calculating capital requirements, having reviewed and assessed the Standard Formula as appropriate for the firm. Scottish Friendly complies in all material respects with the requirements of the PRA rulebook and regulatory framework related to the SCR and MCR.

The capital position of the business is estimated on at least a monthly basis, with the results communicated to the Board. The Risk Committee reviews solvency by risk indicators and the financial markets are monitored with the implications on solvency considered if volatility triggers are breached.

The Own Funds are summarised below with more detail provided in the Appendices which contain the relevant Quantitative Reporting Templates.

	2025	2024 Restated
	£000	£000
Own Funds	126,649	134,566
Minimum Capital Requirement	28,965	28,013
Solvency Capital Requirement	64,366	62,250
Solvency Ratio	196.8%	216.1%

The solvency coverage ratio has reduced relative to the 31 December 2024 position, primarily as a result of project and marketing costs incurred by the business which - although own funds generative in the long-term – result in an immediate reduction in own funds, as well as the c£5m ProfitShare distribution which was added to eligible Main Fund asset shares in 2025. The latter item did, however, result in an increase in the loss absorbing capacity for technical provisions which partly offset the larger increase in market risk SCR over the year.

Solvency Capital Requirement split by risk modules

The table below shows the risk modules that make up Scottish Friendly Assurance Society Limited's SCR at 31 December 2025.

	2025 SCR	2024 SCR
	£000	£000
Market Risk	42,124	34,913
Counterparty Default Risk	10,079	8,468
Life Underwriting	69,638	61,272
Health Underwriting	1,079	1,327
Undiversified BSCR	122,921	105,980
Diversification Credit	(28,993)	(24,783)
Basic SCR	93,928	81,197
Operational Risk	13,054	13,012
Adjustment due to RFF/MAP	516	604
Loss-absorbing capacity of technical provisions	(33,529)	(29,516)
Loss-absorbing capacity of deferred taxes	(9,603)	(3,046)
Solvency Capital Requirement	64,366	62,250

The components of these risk modules are shown in section C of this report.

The SCR for each of the risk modules have been determined using a comparable approach with the prior year.

The calculation of Scottish Friendly's SCR has been carried out using the parameters of the Standard Formula. No undertaking-specific parameters were used.

No simplifications have been applied within the calculation of the SCR.

No capital add-on has been applied to the SCR calculated by Scottish Friendly.

Minimum Capital Requirement

The MCR has been calculated as the minimum of 45% of the SCR and the greater of 25% of the SCR and the linearly derived MCR.

The detail of the MCR calculation is shown below:

	2025	2024
	£000	£000
Linear MCR	50,527	35,787
SCR	64,366	62,250
MCR cap	28,965	28,013
MCR floor	16,091	15,563
Combined MCR	28,965	28,013
Absolute floor of the MCR	3,500	3,500
Minimum Capital Requirement	28,965	28,013

E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

Scottish Friendly is not using the duration-based equity risk sub-module.

E.4 Differences between the standard formula and any internal model used

Scottish Friendly has not used an internal model or partial internal model in the calculation of the SCR.

E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

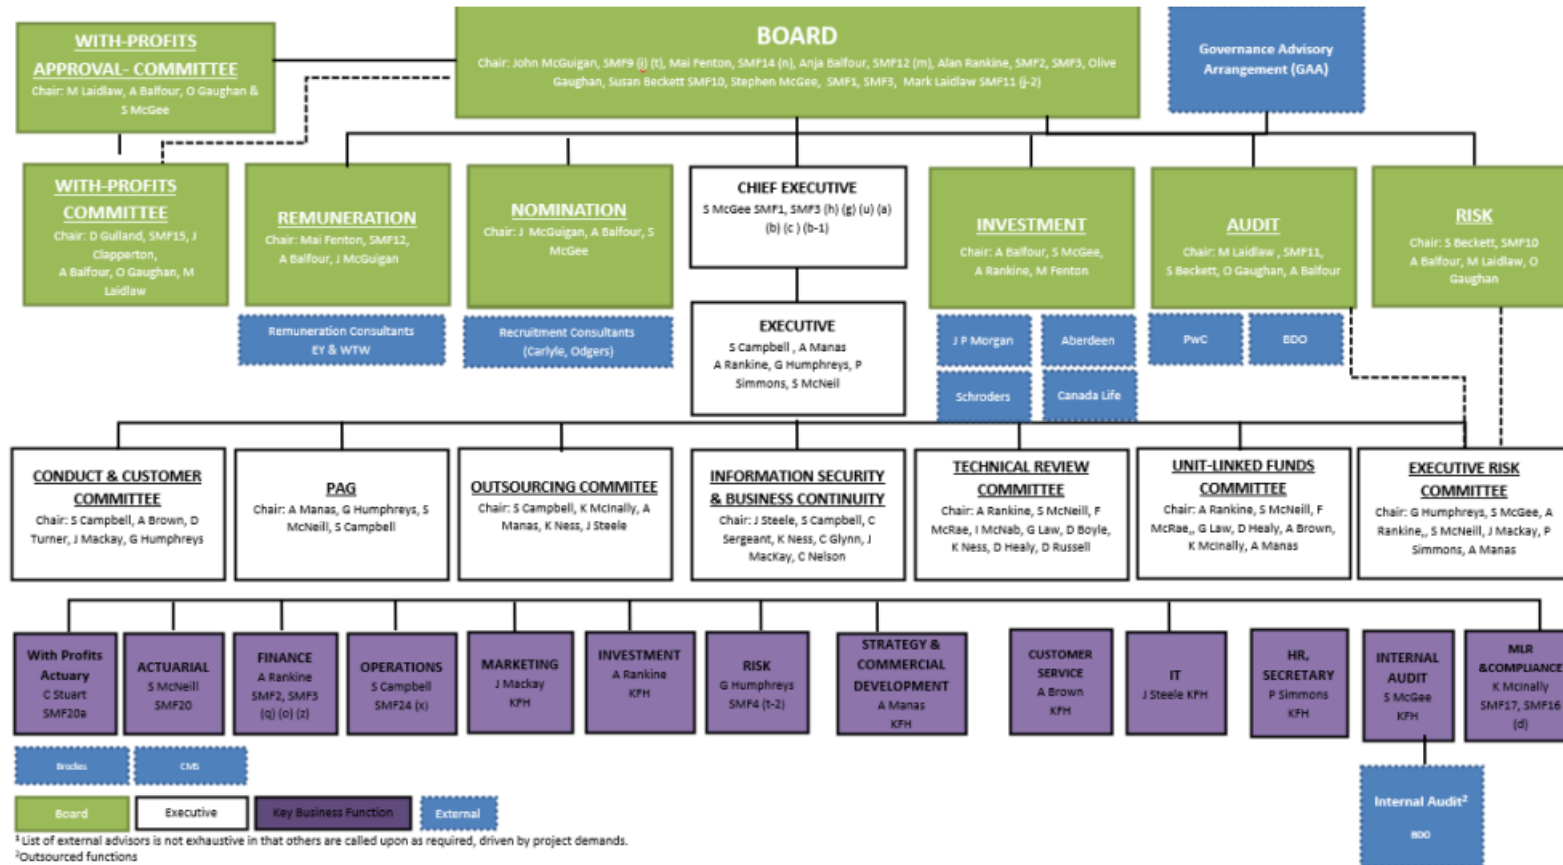

Scottish Friendly has complied with the MCR and the SCR throughout the period.

E.6 Other Material Information

There is no other material information to disclose in respect of capital management.

F APPENDICES

Appendix 1 – Management Responsibilities Map

F.2 Individual Performing Function (as at 31 December 2025)

SMF / KFH	Regulator	Function	Individual Performing Function
SMF1	PRA	Chief Executive function	Stephen McGee
SMF2	PRA	Chief Finance function*	Alan Rankine
SMF3	FCA	Executive Director	Stephen McGee
SMF3	FCA	Executive Director	Alan Rankine
SMF4	PRA	Chief Risk function*	Genevieve Humphreys
SMF9	PRA	Chair	John McGuigan
SMF10	PRA	Chair of the Risk Committee	Susan Beckett
SMF11	PRA	Chair of the Audit Committee	Mark Laidlaw
SMF 12	PRA	Chair of the Remuneration Committee	Mai Fenton
SMF14	PRA	Senior Independent Director	Anja Balfour
SMF15	FCA	Chair of the With-Profits Committee	David Gulland
SMF16	FCA	Compliance*	Kevin McNally
SMF17	FCA	Money Laundering Reporting	Kevin McNally
SMF20	PRA	Chief Actuary function	Scott McNeill
SMF20a	PRA	With Profits Actuary function*	Callum Stuart
SMF24	PRA	Chief Operations Function	Stephen Campbell
KFH	PRA	Internal Audit Function**	Stephen McGee
KFH	PRA	Investment	Alan Rankine
KFH	PRA	Marketing	Jill Mackay
KFH	PRA	IT	John Steele
KFH	PRA	Strategy and Commercial Development	Alexander Manas
KFH	PRA	Human Resources	Pamela Simmons
KFH	PRA	Customer Service	Alan Brown

* Denotes SMF's that are mandatory key functions.

** Stephen McGee is the Key Function Holder for Internal Audit however the prescribed responsibility sits with Mark Laidlaw, Chair of the Audit Committee.

Notes:

1. Anja Balfour and Olive Gaughan do not hold a SMF role under the regime but both retain their role of non-executive director.

F.3 Public Quantitative Reports Template

The following public Quantitative Reports Templates (QRTs) are disclosed:

IR.02.01.02 Balance Sheet

IR.05.02.01 - Premiums, claims and expenses by country

IR.05.03.02 Life income and expenditure

IR.12.01.02 Life technical provisions

IR.23.01.01 Own Funds

IR.25.04.21 Solvency Capital Requirement

IR.28.01.01 Minimum Capital Requirement

Scottish Friendly

Solvency and Financial Condition Report

Disclosures

31 December
2025

(Monetary amounts in GBP thousands)

General information

Entity name	Scottish Friendly
Entity identification code and type of code	LEI/21380058XYHZ.JQMXDQ26
Type of undertaking	Life undertakings
Country of incorporation	GB
Language of reporting	en
Reporting reference date	31 December 2025
Currency used for reporting	GBP
Accounting standards	Local GAAP
Method of Calculation of the SCR	Standard formula
Matching adjustment	No use of matching adjustment
Volatility adjustment	No use of volatility adjustment
Transitional measure on the risk-free interest rate	No use of transitional measure on the risk-free interest rate
Transitional measure on technical provisions	No use of transitional measure on technical provisions

List of reported templates

-

IR.02.01.02 - Balance sheet

IR.05.02.01 - Premiums, claims and expenses by country: Life obligations

IR.05.03.02 - Life income and expenditure

IR.12.01.02 - Life technical provisions

IR.23.01.01 - Own Funds

IR.25.04.21 - Solvency Capital Requirement

IR.28.01.01 - Minimum Capital Requirement - Only life or only non-life insurance or reinsurance activity

IR.02.01.02
