

Key Information Document

Purpose

This document provides you with the key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

The My Select JISA life policy, is manufactured by Scottish Friendly Assurance Society Limited ('Scottish Friendly'). The Investment option is the Climate Leaders Fund which is manufactured by Scottish Friendly, and links to 1 or more funds managed by Schroders. Visit www.scottishfriendly.co.uk or call 0333 323 5433 for more information. Scottish Friendly is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. Details can be found on the Financial Services Register – Registration No. 110002. This Key Information Document was produced on 6th April 2026.

What is this product?

Type

The Investment option is the Climate Leaders Fund which is manufactured by Scottish Friendly, and links to 1 or more funds managed by Schroders.

Objectives

The Climate Leaders Fund predominantly invests in the Schroder ISF Global Climate Leaders Fund.

The fund aims to provide capital growth by investing in equities of companies worldwide which the investment manager believes will benefit from efforts to accommodate or limit the impact of global climate change, and which meet the investment manager's sustainability criteria.

To meet these criteria, and in selecting companies in relation to climate change, the fund invests in businesses that have set targets aligned with limiting global warming to 1.5°C or less, in line with the Paris Agreement.

The fund avoids companies involved in the production of nuclear, biological, or chemical weapons, cluster munitions, depleted uranium, landmines, or white phosphorus incendiary weapons.

It also excludes companies whose revenue exceeds:

- 5% from fossil fuel extraction and production,
- 1% from the exploration, mining, extraction, or refining of hard coal or lignite,
- 30% from thermal coal power generation,
- 10% from tobacco production,
- 25% from tobacco-related activities, or
- 10% from weapons manufacturing.

In addition to these exclusions, and to support its climate change objectives, the fund avoids companies that violate the United Nations Global Compact (UNGC) principles or the Organisation for Economic Co-operation and Development (OECD) guidelines.

Furthermore, it excludes companies that derive:

- 10% or more of their revenue from oil or gaseous fuels, or
- 50% or more of their revenue from electricity generation with a greenhouse gas intensity greater than 100g CO₂e/kWh.

The value of investments within the fund may fall as well as rise, and a positive return is not guaranteed. Your child may get back less than you paid in.

Maturity

This product matures when the child reaches age 18. The recommended holding period is at least 5 years. Scottish Friendly cannot unilaterally terminate this product.

Intended retail investor

This product is intended for investors who are prepared to take on a medium level of risk, linked to the performance of the global companies who aim to benefit from efforts to accommodate or limit the impact of global Climate change, in a medium to long-term arrangement.

Insurance benefit

The amount payable on death is 101% of the value of units held within the policy.

What are the risks and what could the child get in return?

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you transfer to another provider or the child cashes in at an early stage and they may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay the child.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay the child.

The product does not include any protection from future market performance so the child could lose some or all of the investment. If we are not able to pay the child what is owed, they could lose the entire investment. However, they may benefit from a consumer protection scheme (see section 'What happens if we are unable to pay you'). The indicator shown above does not consider this protection.

Performance scenarios

When money is invested it is exposed to risk, meaning that your child may get back less than was invested. The outcomes experienced will come from the returns of the investment(s) which are held by the fund. This fund invests in equities from around the world (shares in companies) therefore the performance of companies from around the world will have a significant impact on returns. Additionally the returns received could be expected to be influenced by the overall performance of the UK. It is expected, before charges, that the returns would be comparable to the UK and Global stock markets against which the performance of the fund is measured.

What could affect my return positively?

Strong economic performance, where the economy is growing around the world, this would likely lead to a positive outcome for investors. Where companies from around the world perform well resulting in their share prices increasing this would likely lead to a positive outcome.

What could affect my return negatively?

Poor economic performance also known as a recession impacting companies from around the world, resulting in falling share prices would negatively impact the returns. Under severely adverse conditions returns of the fund could be negative meaning investments in the fund could fall significantly in value. Your child's maximum loss would be that they lose all of their investment.

What happens if Scottish Friendly is unable to pay out?

If you buy a policy with Scottish Friendly and we cannot pay the full amount due, the child may be entitled to compensation under the Financial Services Compensation Scheme. The maximum level of compensation for claims against firms declared in default is 100% of the claim with no upper limit.

What are the costs?

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return the child might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself. They include potential early exit penalties. The figures assume you invest £10,000 at outset. The figures are estimates and may change in the future.

Table 1: Costs over time

The person selling you or advising you about this product may charge you other costs. If so, we will provide you with information about these costs and show you the impact that all costs will have on your investment over time.

£10,000	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years (the recommended holding period)
Total costs	£188.30	£498.53	£808.54
Reduction in Yield per year	1.88%	1.53%	1.37%

Table 2: Composition of costs

The table below shows:

- The impact each year of the different types of costs on the investment return the child might get at the end of the recommended holding period.
- The meaning of the different cost categories.

One-off costs	Entry costs	0.00%	The impact of the costs you pay when entering into your investment.
	Exit costs	£50.00	The impact of the costs of exiting your investment when it matures.
Ongoing costs	Portfolio transaction costs	0.07%	The impact of the costs of buying and selling underlying investments for the product.
	Annual Management Charge (AMC)	£0.00 - £5,000 = 1.50% £5,001 - £20,000 = 1.00% £20,001 and over = 0.50%	We take a fee each month to manage your fund. This is shown as an annual rate and referred to as an AMC.
Incidental costs	Performance fees	0.00%	We do not take a performance fee from your investment.
	Carried interests	0.00%	We do not take carried interests from your investment.

How long should I hold it and can I take money out early?

Recommended minimum holding period: 5 years

This product has no minimum required holding period. It is designed to provide potential growth on investments over the medium to long term, so you should expect to leave your money invested for at least 5 years. Within the first 5 years of setting up the policy, if it is transferred by the registered contact to another Junior ISA manager, or if the child turns 18 and requests a withdrawal which would leave a value of less than £50 in their policy, there will be a £50 deduction from the child's plan.

How can I complain?

If you wish to complain about any aspect of the service you have received you can contact us at Scottish Friendly, Galbraith House, 16 Blythswood Square, Glasgow G2 4HJ. Tel: 0333 323 5433.

Other relevant information

Please note that the figures assume you invest £10,000 at outset, which is the required amount we are able to show based on the regulation for this product. As such this Key Information Document should be read in conjunction with the Product Guide and Terms & Conditions, which provides additional examples of what the child could get back in the future based on you paying a lower investment amount.

Other policy documentation relating to this product, such as the Product Guide and Terms & Conditions are available at www.scottishfriendly.co.uk/isa-investments
