

# DYNAMIC *Women*

WASHINGTON D.C.

## Jennifer Parker Porter, MD, FACS

**CHEVY CHASE FACIAL PLASTIC SURGERY  
FOUNDER & MEDICAL DIRECTOR**

**F**acial plastic surgery offered the rare opportunity to unite Dr. Jennifer Parker Porter's passions—the precision of science and creativity of art. Over time, her career evolved beyond surgical excellence into something more enduring: using her platform to serve others. "Early in my career, I associated success with ambition," this Dynamic Woman reflects. "Now, I see it as equally rooted in giving back to the community."

A double board-certified facial plastic surgeon with more than 27 years of experience, Dr. Porter built her reputation on both expertise and integrity. Building a practice from the ground up demanded perseverance, adaptability and vision. She faced moments of uncertainty but remained anchored by a commitment to excellent patient care. Today, she is recognized worldwide for her work in rhinoplasty, revision rhinoplasty, face and neck lift, blepharoplasty and nonsurgical enhancements—always dedicated to natural results that enhance rather than alter a patient's identity.

Her definition of a Dynamic Woman has also shifted. "She doesn't just lead; she creates space for others to thrive," Dr. Porter says. That philosophy extends to her community work, where she serves on several nonprofit boards focused on women's empowerment and access to healthcare and education. "Representation matters," she adds, "for aspiring surgeons and for patients who want to see themselves reflected in their care providers."

A three-time Best of the City honoree, Dr. Porter was most recently named Best Facial Plastic Surgeon—Maryland in Modern Luxury's Best of the City 2025. Washington, D.C., is her forever home, where she grew up, raised her family and built a practice that attracts patients from around the world.
