

The Grade 10 Foundry Hook Single Leg Lifting Hook Location System, (also known as the "Hampshire Hook") consists of a Grade 10 Clevis Reeveable Egg Link, three links of Grade 10 chain and a Clevis Foundry Hook.

At the tip of the Foundry Hook, there is a drilled hole and a stainless steel 'D' shackle fitted. The purpose of the shackle is to attach a rope line.

This system is devised to enable the safe retrieval of submersible equipment from wet wells and similar locations. A number of water companies prefer this system to a traditional chain system or the Grade 8 Lifting 'C' Hook type.

Chain Size (mm)	W.L.L. (t)	Dimensions (mm)						
		A	B	C	D	E	F	G
10	4.0	361.4	155	74	65.2	18	100	32
13	6.7	477.5	186	88	71.6	22	136	39
16	10.0	570.0	220	98	81.7	26	158	47
