

RGL8 BIGGUY

TWIN LEG ROPE LANYARD & SHOCK ABSORBER (Tested and approved for a user weight up to 140kg)

The Big Guy shock absorber lanyard range offers fall protection for users up to 140kg, when used with any RIDGEGEAR harness.

This lanyard comes with two aluminium, ANSI rated scaffold hooks which have increased gate strength.

An industry standard, and usually the minimum equipment issued/required with a harness for anyone working at height. We use 11mm kernmantle rope which has machine stitched connection eyes at each end. The protective sleeves at the rope ends help to protect against stitch abrasion.

The extra leg allows progression between anchor points by means of double clipping, and also optimum safety by ensuring the user is always connected. This system is generally used for tower climbing, steel erecting, scaffolding and maintenance to open structures.

The RGL8 Big Guy is supplied at a length of 1.4m including hooks/karabiners.

Shock absorber

ANSI approved scaffold hook

Accredited to: EN 355:2002

Material: 11mm kernmantle nylon rope

Fittings: 17mm steel screwgate karabiner (RGK1)
