

RGL2

SINGLE LEG ROPE LANYARD & SHOCK ABSORBER

The RGL2 Lanyard is of traditional type, using 11mm kernmantle rope which has machine stitched connection eyes at each end.

The lanyard is fitted with a standard shock absorber pack, even though the rope itself has some shock absorbing capacity. The rope used in the manufacture of this lanyard, shows some resistance to alkalis, oils and organic solvents.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point.

Shock absorber
