

## RGL3

### TWIN LEG WEBBING LANYARD & SHOCK ABSORBER

A twin leg lanyard with the same specifications as the RGL1 additionally allows movement between anchorage points by means of double clipping.

This system is generally used for tower climbing, steel erecting, scaffolding and maintenance on open structures. The twin leg feature enables the user to always remain connected, therefore ensuring optimum safety. We use 32kN polyester webbing to manufacture this product which helps give the product a longer life. It is also treated with a water repellent coating which also extends the life of this product.

Shock absorber

Accredited to: EN 355:2002

Web material: 26mm RIDGE Protect anti-bacterial polyester\*

Fittings: 17mm steel screwgate karabiner (RGK1) & any compatible EN 362 connectors

Max arrest force: <6kN

Length(s): 1.3m  
1.8m

\* 14 times reduction in bacterial growth, according to ISO 20743:2013 contact with *K.pneumoniae*, commonly associated with healthcare infections such as *E.coli*
