

RGL6

SINGLE LEG ELASTICATED WEBBING LANYARD & SHOCK ABSORBER

A general-purpose lanyard used when the operative is working from a static position connected to a fixed anchor point.

If movement between anchorages is required, a twin leg lanyard should be used (RGL9) to provide constant protection. The elastic in the lanyard reduces the amount of hanging slack, which helps to reduce trip hazards and entanglement.

Accredited to: EN 355:2002

Material: 35mm polyester

Fittings: 17mm steel screwgate karabiner (RGK1) & any other compatible EN 362 connectors

Max arrest force: <6kN

Length(s): 1.15m - 1.8m (based on using RGK1 + RGK1)

Shock absorber

Expanding elasticated webbing
