

## RGL4

### WEBBING EXTENSION STROP

The RGL4 is used as an extension strop fitted to the rear D ring of a full body harness.

When used in this manner, it allows an operative to self-connect to a fall arrest block (RGA range) by extending the attachment point on the harness, and bringing it into the field of vision. We use 26mm 32kN webbing in the manufacture of this product which provides greater strength, wear and shear resistance compared to other webbing.

It is also treated with a water repellent coating which should extend the life of this product.

Accredited to: EN 354:2010

Web material: 26mm RIDGE Protect anti-bacterial polyester\*

Fittings: 10mm screwgate delta link (RGK12) & any compatible EN 362 connectors

Length(s): 0.45m (including connectors)

\* 14 times reduction in bacterial growth, according to ISO 20743:2013 contact with *K.pneumoniae*, commonly associated with healthcare infections such as *E.coli*
