

RGB2

TWIN D RESTRAINT BELT

The RGB2 is fitted with a buckle and side D rings and is a work positioning/restraint belt.

This belt is fitted with two side mounted D rings for ease of attachment and the back pad provides some lumbar support and comfort, especially when tools are hung from the belt loops. The RGB2 is normally used in conjunction with a RGL5 restraint lanyard or RGP11 work positioning lanyard.

It is important that the user understands the difference between fall arrest and restraint before using this item.
