

RGL14

TWIN LEG WEBBING RESTRAINT LANYARD

The RGL14 Twin Leg lanyard is an industry standard for restraint lanyards, and normally the minimum equipment issued with a harness for working at height.

The 32kN webbing used in the manufacture provides greater strength compared to other webbing and systems. This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. Movement between anchorages can be achieved by means of double clipping. This lanyard can be fitted with any compatible EN 362 connectors.

Only suitable as a restraint lanyard with no risk of a fall. Never use for fall arrest.

Accredited to: EN 354:2010

Material: 26mm RIDGE Protect anti-bacterial polyester*

Fittings: Supplied without connectors unless stated otherwise

Max arrest force: Restraint only - Not to be used as fall arrest

Length(s): 1.3m

1.8m

(including connectors)

* 14 times reduction in bacterial growth, according to ISO 20743:2013 contact with *K.pneumoniae*, commonly associated with healthcare infections such as *E.coli*
