

RGL5R

SINGLE LEG ROPE RESTRAINT LANYARD

The RGL5R can only be used for fall restraint as there is no shock absorption built into the system. If there is any possibility of a fall, then a fall arrest product MUST be used.

We use 11mm kernmantle rope in the manufacture of this product which provides greater strength and superior wear resistance compared to webbing. The RGL5R should NEVER be used to extend another fall arrest product.

Accredited to: EN 354:2010

Material: 11mm kernmantle nylon rope

Fittings: Supplied without connectors unless stated otherwise

Length(s): 1m

1.3m

1.8m

(including connectors)
