

## REMINDER: DO NOT RELY ON YOUR RT ON PUBLIC ROADS

### Right Channels

Thanks to Log Transport Safety Council for the image.

### What Happened:

There have been several near misses between logging trucks and other vehicles since the beginning of the year on public roads.

### What was the core issue:

- We are using public roads and there are many vehicles travelling without a radio.
- Many of these roads are narrow and gravel with blind corners.

### What needs to improve:

- **KEEP LEFT AND SLOW DOWN!**
- Expect a vehicle around every corner and ensure you can STOP within half the visible distance.
- **Public roads ARE NOT RADIO CONTROLLED.** RT is for courtesy with other heavy traffic.
- Do call up at every marker **but don't rely on your RT.**
